Introduction

Intellectual minds have been responsible for pioneening countless innovations, throughout the course of history in vanious societies and civilizations. The famous western Philosopher, Plato, also advocated for the rule of intellectuals, necessary to govern swiftig gntellectuals and their intellectual ingenuity is couciet to push forward any country towards prosperity and development But, developing countries now a days, one facing huge losses of talented and intelligent bensons because such people find them inhospitable for their services. Unfortunately, Polistan is one of them. It has been a victim of Brain Drain since its irreption. Recently, there has been a sunge in this process as Paliston's economy has been shaky over the past

Day:_ few years The high unemployment vartes, law wages and limited caneer development opportunities compel sym beoble to seek employment abnoad The youth feels that their skills age not being properly recognized by these counties, which causes them to move abroad in countries that are more open to broviding them fain compensation for their talents. Bt leaves detaimental impacts on sounce countnies such as neluction in consumer spending loss of tax nevenue and deterioration of health-cane and educational sectors on this way, Brain Dogin poses a senious threat to these counties. Thus, the causes of Brain Drain including Political instability and lack of oppositionities lead to devastating autcomes such as reduced eranomic growth and aiminished innovation in sounce countries The progress of daylobing countries will remain a significant challenge for them until this issue is negotived
