u r the first student online which got passing marks the time i started online evaluation all the best luck

c- Preemptive efforts to promote peace and prevent war at international level

~~Case in point: Role of United Nations as peace promotor~~

4- Retrospective glance at failures due to lack of proactive measures

i- World War I

ii- Great Depression (1930)

iv- World War II

v- Natural disasters caused by neglect

5. Conclusion

In the serene moments of our lives, when the sky is clear and the sun casts its benevolent rays, lies an often overlooked yet profound truth: the best time to mend the roof is when the sun is shining. The age-old adage, rich with wisdom, speaks not only to the literal act of repair but to the broader philosophy of life. The adage underscores the importance of foresight, the prudence of preparation, and wisdom of proactive measures in the time of tranquility to safeguard against the inevitable storms of life. Whether in the personal realm of health and relationships, the societal sphere of governance and justice, and the global stage of environmental and technological challenges, the principle of preparing in advance is universally relevant.

eschew

Similarly, in realm of financial planning the wisdom of preparing during time of prosperity is the beacon of prudence. Just as farmer stores grains in plenty to weather the harshness of winter, so individual ought to act prudently to tackle with unforeseen circumstances. The bustling activity of prosperous times endues perfect opportunity to build an emergency funds, invest wisely and make robust financial cushion. This foresight acts as a bullwark against the unforeseen financial crises, transforming the potential hardships into manageable challenges. By establishing a firm financial foundation not only secure our present but also serve as resistor against future financial crises.

Additionally, for nurturing relationships trust and communication are imperative. These virtues are regarded as indispensable tool for healthy relationship. Trust, the cornerstone of any meaningful relationship, if not build in moment of peace, the nature of relationship might get affected. In similar vein, open communication, shared experiences and act of kindness

Date: 1/20

also fosters the good relationships. Thus, when individuals invest in relationships during time of harmony, it becomes reservoir for goodwill and resilience and withstand the pressure of discord. Henceforth, mending roofs of relationships while sun shines, ensures that these connections remain strong and unyielding, providing shelter and comfort through all seasons.

~~Furthermore~~, when one grows up career development in individual life is the primary requisite for sustainability. For this purpose, sagacious decision making is necessary. Timely deciding about future opens the door for uncharted opportunities.

At very start of this, choice of educational program and subsequently the desired field pave way for thriving career. The prepared decisions ensure that one is not merely adrift but steering career towards thriving future. Thus, by diligently tending to career growth at proper time seize the boundless opportunities that lies ahead. Henceforth, for living a dream life anticipated decision making is essential.

Moreover, the law and order of ~~any~~ <sup>in every society</sup> society is propped up by its justice system. Putative efficacy of judicial institutions is only ensured by swift and apt justice. So, well-functioning judicial system is the cornerstone of ~~any~~ <sup>use any in negative form</sup> civilized society. When justice is delayed, it is often denied, leading to breakdown of trust and erosion of societal values. This is epitomized in the phrase, "justice delayed is justice denied", reminding ~~us~~ <sup>do not remind</sup> that timely adjudication is crucial. The integrity of a society hinges on its ability to dispense justice promptly and fairly, addressing grievances before they fester into great conflicts. Henceforth, when justice system effectively and swiftly adjudicate the problems, then society remains in orderly circumstance and remains steadfast and unshaken.

In addition to it, along with other looming crises in society, it also grapples with another challenge of burgeoning population. Since unchecked population growth can strain resources, disrupt economic stability, and

Fragile social fabric - Proper management of population is essential approach. By implementing thoughtful policies and preemptive measures, society can navigate the demographic problem and address them accordingly. Timely family planning programs, education and other awareness policies to stop explosion of population is very essential for harmonious balance between humanity and resources upon which it relies - China's one child policy was great measure to stop explosion of population bomb. Henceforth, through such visionary stewardship, the potential chaos of overpopulation can be transformed into an opportunity for sustainable progress and equitable prosperity.

Besides, the adage, in realm of governance, finds its most poignant application - Good governance is not a product of reactive policies hastily cobbled together in face of imminent crises, but rather the fruit of deliberate, forward thinking leadership. Moreover, good governance relies on prompt policy making and its implementation. Government must anticipate the needs of its

citizens to navigate complexities of its people. For instance, the swift and decisive response of Pakistani government to COVID-19 pandemic stands as a testament to the power of preparedness. By swiftly implementing lockdown, enhancing healthcare infrastructure and launching public awareness campaigns, government was able to mitigate the impact of virus. Henceforth, good governance, then, is akin to a sturdy roof, constructed and maintained diligently, offering shelter and stability to all who dwell beneath it.

Moreover, education is pivotal aspect in anyone's life. In tender years of childhood, when minds are as malleable as clay, lies the unparalleled opportunity to shape future generations through moral education. As moral education, imparted during the impressionable years of childhood, serves as the cornerstone upon which virtuous character and ethical judgment are built. Plato, the ancient Greek philosopher, extolled the virtues of early education, recognizing it as bedrock upon which a just and virtuous society must be built. By instilling

u can improve it more by exerting on your punctuation

ethical principles and fostering a sense of right and wrong during these formative years, lay groundwork for society rooted in integrity and compassion. Thus, the essence of proverb reverbrates through the ages: to nurture virtue in the sunshine of childhood to fortify moral fabric of society against tempestuous trials of tomorrow.

Additionally, the current gruesome tale of environmental crises call for collective pragmatic measures before it exacerbates more. Healthy ecological circumstances benefits the humans both physically and mentally. The burgeoning crises of climate change, deforestation, pollution and global warming looms over us like gathering storm clouds together. Conservation efforts such as protecting endangered species and preserving natural habitats, serve as our fortifications against ecological collapse. Investing in renewable energy sources, such as solar and wind power, during time of economic stability, serve as shield against inexorable depletion of fossil fuels and ravages of climate change. Therefore, the wisdom of

realme

addressing environmental issues before they escalate into insurmountable crises is not merely a matter of practicality but a profound moral imperative, reflecting our commitment to future generation and sanctity of natural world.

this is not your level of transition

Furthermore, the technological advancement has revolutionized the world. Owing to this the world has become global village. After every passing day new inventions are introduced in arena of technology. The introduction of Artificial Intelligence is no different - from the very simple assignment at school level to the very advance level of its introduction. Artificial Intelligence has changed life altogether. Man has now overtly dependent on it. Prima facie, it attracts the human owing to its offer of easiness. Nonetheless, the dark side of AI tells the another tale. The overdependence on AI necessitates the scrutiny of AI before it becomes problematic. As the creativity of man is becoming dormant and eventually be marred due to overusage. Henceforth, the it is time to haul it overdependence lest **realme** Shot on realme C21

Along with other, the adage can be applied in international context as well. In the intricate web of international relations, the specter of global health crisis looms large, reminding us of critical need for proactive measures. The world, now more interconnected than ever, faces constant threat of pandemics that can swiftly transcend borders, wreaking havoc on populations and economics alike. The nations which are foresighted and vigilant, fortify their defenses through robust pandemic preparedness and comprehensive programs can mitigate the crises. These sort of nations illustrate how anticipation and preparedness can avert catastrophe. As the global community grapples with these realities, it becomes evident that the time to bolster our defenses against health threats is not in throes of crises, but during calm, when preparation is possible and most effective.

In addition to, the global economics is always marked by fits and starts. The time of prosperity can swiftly falter into discord. It is proven from evidentiary past that the cataclysmic impact of financial crises were echoed across

continents. The proactive orchestration of economic policies, therefore, is not merely an exercise in prudence but a safeguard for global stability. Institutions like World Bank and IMF emerges as sentinels in this endeavor. Through strategic funding, rigorous economic assessments and fostering economic cooperation, these bastion of economic governance are enough to catch fiscal peril. Henceforth, the pre-emptive fiscal policies at international level can stave off the specter of financial crises, ensuring that prosperity enjoyed today does not become ruin of tomorrow.

Besides, in international relations the quest for peace often hinges on art of diplomacy and proactive measure of global institutions. Peace or pacifism is the need of humanity. Thus for promotion of peace various organizations were established. United Nations is one of them. It was the organization that was born from the ashes of conflict - It stands a testament to humanity's collective desire to avert the horrors of war and foster the world where dialogue prevail over discord.

Date: / / 20

Through its peacekeeping missions, mediation efforts and development programs, the UN exemplifies the adage that preparing for peace in times of calm is far more prudent than scrambling for solution amidst the chaos of conflict. Therefore, it is in these one finds proactive measures that we find true essence of peacekeeping.

Along with various pros of taking proactive measures, there are stark repercussions of neglecting preemptive approach when we unfurl the history. The dawn of 20<sup>th</sup> century, marked by unprecedented technological and industrial advancements, also bore witness to a cataclysmic failure of foresight. World War I is the great example in this regard. During that era, nations drunk on their newfound powers ignored the simmering tensions that crackled beneath the surface. Diplomatic channels were left unattended, alliances were shoddily maintained and the incendiary powder keg of Europe was allowed to fester until a single spark ignited a conflagration that engulfed the world. Similarly, the Great Depression stands as a grim testament to the peril of complacency. During time of economic boom the unsustainable

bubble's warning was brazenly ignored. Thus, lax regulatory frameworks, rampant speculation and lack of proactive strategies plunged the millions into destitution and despair. These historical calamities serve as enduring reminders of the cost of inaction. The lesson etched into the annals of time implore us to heed the wisdom of proactive measures, to safeguard against capricious whims of fate.

Recapitulating the whole, the adage "the time to repair roof when the sun is shining" embodies the timeless wisdom within its simple words. The adage, besides its literal meaning, holds real life implications. It urges one to harness the power of foresight, to embrace the quiet strength of preparation, and to act with deliberate prudence during times of peace and prosperity. In realm of health, finance, relationships, governance and beyond, the virtue of proactive measures stand as beacon of hope and stability. Moreover, the failure to adopt proactive measures reverberates through history. The cataclysm of World War I, the profound desolation of

Date:    /    / 20

Great Depression, the devastation wrought by unheeded natural disasters and moral decay stemming from neglected education all stand as somber testaments to the perils of inaction - Each instance, a poignant reminder of what transpires when the roofs of our societies, economies, and lives are left unrepaired under clear skies - Henceforth, these roofs must be mended for fortification against inevitable tempests of future
