- 4.3.3 Increase Budget of Education

### 4.4 Increase Research and Development

#### opportunities:

- 4.4.1 Increase government financing for Research and Development

- 4.4.2 Increase Research Infrastructure

- 4.4.3 Give Adequate Research opportunities

### 4.5 Career Advancement opportunities:

- 4.5.1 Increase Meritocracy in Jobs and Educational Institutes.
- 4.5.2 End Nepotism
- 4.5.3 End corruption

## 5. Conclusion:

10/10  
100%  
100%

66. The Brain Drain is a critical problem that goes beyond borders and has effects world wide" (Dodaro and Lopez). Brain Drain has been one of the considerable issue in Pakistan. Many highly skilled and educated persons emigrate to other nations, which leaves vacant space left in Pakistan which ultimately causes adverse effects to the Nation. The main reasons that causes brain drain are economic limitations with few job opportunities, very low salaries and high taxes. In the same way; political, educational, research and developmental causes are those that force a person away from the country and contribute his skills to other country. Consequently, it has drastic effect on country's economy, negative effect politically, educational loss, research and development. Reduction, decreased cases and Amendments. In order to tackle this issue, the government must give reforms in economic level, by giving job opportunities and give them benefits in salaries. Practically, the success and work of government can be improved through implementing policies, give people's justice, respect their rights and decrease violation in the country. In the same way,

Educational Inequality and Budget must be increased that attract state persons to live here rather than go abroad.

Good in basic grammar
