Title: Role of Urban green space in City life

Urban green space provide a peaceful place in bustling cities. Park greenery create a perfect balance between urban development and environmental protection. Except that, city park strengthen community bonds by hosting various activities and events. These activities in communal space contribute in betterment of well-being. However, challenges offered by urbanization can be mitigated by sustainable urban planning. As preservation and enhancement of urban green space is a shared responsibility, nurturing a prosperous blend of human and environmental progress.
