(b) Art and literature Sector: AI facilitates Artists and writers to meet up with the necessities of modern world of art.

(c) Jobs: AI is expected to create 97 million new jobs by 2025 according to World Economic Forum. According to report by linkedIn AI specialist role is grown by 741% in past 4 years.

(d) Medical Sector: AI works restlessly, so it can operate a lengthy surgery with same strength and potential where human doctors may become bored mentally and not give their 100%.

(e) Creativity: AI can boost creativity by using new ideas and old thoughts comprehensively.

The Essay

Our technological powers is increased but the side effects and potential hazards also escalate. Therefore we should use the power intellectually not abusing the power. The great world powers bent towards the AI fastly in spite knowing AI has very potential hazard for mankind in many instances. Unfortunately AI killing the creativity of mankind, it effects the environment badly, it reduce the job opportunities, it kills the human to human relationship by bonding there dependency from human to machines. AI kills the original thought of people, it kills the essence of emotions from literature and arts, it destroys the creativity by homogenizing the world. AI eliminates the ethical values present in mankind, it destroy teacher-student relation because students now use "chatGPT" for acquiring answers of their questions by this it produce sparkles concerns in teachers. In medical profession AI overcomes the human doctors but AI lacks the medical ethical value and emotions for example a patient comes with severe illness and there is less chance to save his/her life and it is in severe pain then AI prefers the euthanasia but a human doctor values the emotions of patient and their attendants he encourage the patient for re-born and fight with severe illness, so by keeping all these concerns in mind AI seems a potential threat to Mankind. In First section of this essay I would am discuss the sectors where AI is not considered.

Potential Threat To ~~Man~~ankind; whereas the second section would ~~encounter~~ the arguments which given in the favour of AI. If we want human on Earth we should use technology with checks and controls, and use technology with balance. The overuse of AI can turn humans into borgs in long runs.

Now first comes the Educational sector where AI ~~is~~ not considered A Potential Threat To ~~Man~~ankind. AI works for students and teachers friendly and positively. AI helps students to save their time, compile their assignments, Essays, homeworks and giving answer of their questions. It helps teacher in generating new ideas, new way of teaching, prepare lectures for a teachers, saving their time, reduces their fatigue, give them different perspectives of thinking. AI evaluates the work of students by home. It teaches students within home and in security checks. It motivates and encourage students and teaching staff for their duties and assignments respectively. AI works for students and teachers agumentation. AI facilitates students to solve their queries, it generates self confidence in student, it makes job easy for teachers.
