

Topic:

Backwardness of women leads to Backwardness of Nation.

Outline

A. Introduction:

1.

B. How Backwardness of Women leads to Backwardness of Nation:

1. Illiterate mother can't raise well-educated and well-mannered children.
2. Non-working women can't support her family financially
3. Less ratio of experienced lady doctors leads to miscarriages and increased mortality rates.
4. Almost 50% of women population can be proved as financial burden on nations.
5. Lack of participation in economy development of women can be proved as liability instead of asset.

6. Brilliant human minds wasted in domestic politics instead of innovative developments.
7. Lack of political unique solutions and ideas due to poor women participation.
8. Instable women existance can create male dominance and violent society.
9. Illiterate women provide bad healthcare, nutrition and bad education to their family.
10. Lack of women NGOs and policies cause social unrest and gender inequality.

C. Solutions to empower women for betterment of nations:

1. Education and awareness campaigns to challenge gender inequality
2. Encourage women participation in every domain; Political, Economic, social
3. Addressing violence and discrimination against women.

D. Conclusion:

As about 50 percent of each nation consists of women. Thus, it depends on the nations whether they will use their 50 percent members as a liability or as an asset. However, the backwardness of women is a ticking bomb that threatens the progress of nations. It should be defused with education, empowerment and equality. Because, a nation who is neglecting its half of the population involvement in progress can't compete with a nation whose 100 percent population is involved in progress. Hence; the progress of nations lies in females participation, but only if they empower them. For instance, illiterate mother can't raise well-mannered, well-nourished and well-educated children which will work for development of their nation. Likewise, brilliant minds of women can be utilized in innovations and developments instead of domestic politics. Moreover, non-working women can't divide financial burden, instead they became burdens on nations. so, it can't be navigated

that backwardness of women is backwardness of nations, as women have potentials to transform the progress of nations not only in social, political and economic domains, but also in all fields of life.
