

Q 2: Write the précis of following passage and suggest a suitable title.

In recent years, artificial intelligence (AI) has rapidly transformed various industries, promising increased efficiency, productivity, and innovation. AI systems are being deployed across sectors such as healthcare, finance, and transportation, revolutionizing how businesses operate and deliver services. From predictive analytics that optimize supply chains to personalized medicine driven by machine learning algorithms, AI is reshaping the landscape of human endeavor. However, this technical advancement also raises ethical concerns regarding data privacy, job displacement, and algorithm bias, underscoring the need for careful regulation and thoughtful implementation.

[total words = 85]

Precis :

Title : Artificial Intelligence' in Recent Years

In recent years, artificial intelligence (AI) has increased industrial capacity, creativity and efficiency. AI system has transformed the way bussiness work and deliver services. But this technological advancement also raises many

Date _____

concerns which emphasize ~~on~~ the need of
careful use of Artificial Intelligence.
