

2017 A critique on Prevalent Laziness in  
Society

Title: ~~True Nature of Work and Laziness.~~

The devilish notions of the world are brought by those people who do not know what and how to act at a given time. The devil himself hates laziness and wastage of time. But, that has turned the world into chaos. It is not because of laziness, but the absence of <sup>active</sup> morals. These people are misdirected, as we see in ~~our~~ history that great authoritarians wasted their time by doing nothing. Especially during their energetic lives. However, what they did was entirely notional and without purpose. They attended world conferences, returned to spend their holidays and denied world problems. Similarly, in the modern era, politicians are raising slogans to work but they themselves do not know how to work. As, the members while attending religious conferences, without giving attention, talk about irrelevant things. They would better get employment elsewhere. For this kind of ~~it~~ all.
