(e) Creativity: AI can boost creativity by using new ideas and old thoughts comprehensively.

The Essay

our horizon of knowledge has expanded

~~Our technological powers~~ increased but the side effects and potential hazards also escalate. Therefore we should use the power ~~intellectually~~ not abusing the power. The great world powers ~~bent~~ toward the AI fastly in spite knowing AI has ~~very~~ potential hazard for mankind in many instances. ~~AI killing the~~ ~~creativity~~ of mankind, it effects the environment badly, it ~~reduce~~ the job opportunities, it ~~kills~~ the human to human relationship by ~~banding~~ there dependency from human to machines. ~~original thought~~ of people, it kills the ~~essence~~ of emotions from literature and arts, it ~~degrades~~ the ~~creativity~~ by homogenizing the world. AI eliminates the ethical values present in mankind, it ~~destroy~~ teacher-student relation because students now use "chatGPT" for acquiring answers of their questions by this it produce ~~concerns~~ in teachers. In medical profession AI ~~overcomes~~ the human doctors but AI lacks the medical ethical value and emotions for ~~example~~ a ~~patient~~ comes with severe illness and there's ~~less~~ chance to save his/her life and it's in severe pain then AI prefers the euthanasia but a human doctor values the emotions of patient and their attendants he encourage the patient for re-born and fight with severe illness, so by keeping all these concerns in mind AI seems ~~a~~ potential threat to Mankind. ~~In First section of this essay I would~~ ~~discuss~~ the sectors where AI is not ~~concerned~~ A
