Q. Write a précis of the following passage and also suggest a suitable title: (20)

One night a holy man, Abu Ben Adhem by name, suddenly woke up from a deep dream of peace and saw in his moonlit room an angel writing something in a book of gold. He did not feel at all frightened. The peaceful face of the angel made Abu bold and he said to the angel, "What are you writing?" The angel looked up and replied in a kind and sweet tone, "I am taking down the names of those who love God." "And is my name one among them?" Asked Abu. But the angel replied, "No, it is not." "I pray thee then," said Abu, "To write me down as one who loves his fellowmen." The Angel wrote and vanished. The next night the angel came again with a great light which awaked Abu Ben Adhem: and he showed Abu the names of those who had been blessed by the love of God. And behold! The name of Abu was at-the top of the list.

Solution:

Angel And Holy Man

One night, Abu Bin Adhama saw an angel writing something. On asking about list, the angel replied that he wrote GOD's lovers names. He asked about his name but angel said no. He requested him to write his name in the lovers of fellowmen. Next night, angel showed him another list in which his name was ~~at~~ the top.

Total = 157

1/3rd = 55

Poevi = 57

Tense errors.

Idea is ok. Punctuation needs improvement.

Atomic Energy promises vast possibilities (امکانات) to mankind. Einstein introduced theory of atom which tells that matter (مادہ) and energy (طاقت) can be converted (بدل جا سکتا ہے) into each other and energy has thousand of uses. The problem was how to split atom (ٹوڑنا) and get energy and it was made possible in 1938 by Hahn and Streassman. Then came self- sustaining (مستقل قائم رہنے والی) nuclear chain reaction. Although atomic reactors are not perfect machines and one per cent of total energy is - reduced through them, (ضائع ہو جاتا) even this amount is enormous (کافی). One pound of uranium gives energy equivalent (برابر) to three million pounds of coal. Better reactors will produce more energy with lesser cost and longer duration in future. The uses of atomic energy are manifold (کئی قسم کے لوگ). It can bring peace and prosperity (خوشحال) to the world if used wisely, but simultaneously (ایک ہی وقت میں) it can destroy this earth if used for destructive purposes. It depends upon man to avail (فائدہ اٹھانا) it positively and properly.

You are allowed to submit only one question in one pdf. The remaining questions may be submitted in separate pdfs.

Atomic Energy

Atomic energy contains benefits for humans. Scientists made Einstein's theory on Matter and Energy possible through different experiments to form nuclear energy. Although, it is not perfect but good enough than other energy sources. It is great blessing but may prove as curse. It depends on human activities how do they use it.
