IV- Some suggested measures to overcome the challenges:

A- Provision of sufficient fund

B- Improvement in quality of education through teachers training

C- Uniformed modern syllabus

D- Action against ghost schools and teachers

Education plays a crucial role in development of a nation. From medieval age till to date all nations that have achieved worldwide acclaim have placed education above all else. In addition, Muslims ruled the world because of their remarkable achievements in science and technology. Thus, modern nations have focused more and more on provision of education. Because it promotes national interest in human beings. Moreover, education increases creative capabilities of students who develop multiple things that play an important role in advancement of a country. It also aware human beings about its responsibilities and makes them/it confine to follow the law. Likewise, it

nationalism

their

nourishes brotherhood and reduces racial discrimination in a nation. Furthermore, it plays an important role in development and preservation of a culture that transforms ~~to~~ the upcoming generation easily. Education also ^{pushes} push a country on a growth trajectory. However, classrooms have grappled in myriad challenges including lack of funds. In addition, absence of qualitative and competitive teachers have further worsened education sector. Moreover, deep rooted social and cultural barriers are major hurdles in provision of education. Not only social constraint but also rising cost of education has pushed ~~out~~ many children out of schools.

Whereas these are methods that improve conditions of education sector in Pakistan.

First and foremost is provision of sufficient funds by government. Second

steps should be taken to improve quality of education.

Last action should be taken against ghost teachers. In fact

education plays an important role in development of a nation. It ensures good

character of human beings and promote national interest.

To begin with, education promotes national interest in a country. Because educated persons have the wisdom

and knowledge to work for the betterment of the

country. Such as Bill Gates.

He developed ^{ed} Microsoft software and now his

country is utilising it for fulfilling its national interests. In addition, it produces many freelancers which bring much remittances in a country. Such as Indian students are playing an important role in the GDP of the country by providing multiple services across the world. Briefly, education plays a crucial role in development of national interests.

To conclude, classrooms undoubtedly decide the future of a nation. It is crucial for development of character building and promoting national interest. Since medieval ages, countries have developed due to education. In addition, Muslims encouraged their

role across the world due to provision of education. Hence, due to its crucial role global north and global south have increased its focus on provision of education. As they know their development is dependent on education. It creates a sense of brotherhood and promote national interest in every country. Similarly, it confines people to follow the law and know their responsibilities being a good citizen. However, besides these all ^{these} advantages education sector is facing myriad problems including lack of funds and absence of competent teachers. Whereas, there are solutions to these all puzzles. The main focus should be on provision of funds.

In addition, action should be taken against ghost schools and teachers. Because majority of the teachers are not performing their duties, and they are enjoying privileges of government. Unless these things are not made sure, education system will not produce good citizens. In addition, the government should ensure uniformed modern syllabus so that harmonized mindsets will be generated who will play a crucial role in development of a country.
