    . AI is being used *for* [red annotation] citizen participation in policy making.

ii. AI helps in getting feedback

5. Conclusion

A study by the Haward Business Review found that 60% of government agencies are using AI to improve decision - making. Undoubtedly, AI is playing significant role in various fields. Political system is gaining a lot of benefits to improve its old version. AI powered chatbots are targeting voters to achieve its goal. Moreover, AI is improving administration faciliti-es in basic requirements. AI supports administrat-ion department by providing data analysing system.

Similarly, AI has the potential to connect citizens with policy makers. Citizens partipate in policy making by the help of AI.

AI supports voter in election by sending messages through chatbools. The United States of America's presidential election 2016 is one of the major example. It has both advantages and disadvantages in political system. According to a report of Pew Research Center, 70% of voter believe that AI will play a significant role in future political compaigns. Therefore, AI is supporting political

System.

Not limited to politics but ~~also~~ also AI is creating various best platforms for administration.

AI is being used to improve efficiency and decision making. For example, AI-powered system is being used to collect ~~data~~ data sets to identify patterns and make predictions. Thus, AI is develop-ing new version for admini-stration of the people.

In addition, AI is helping in democratic process. AI supports citizens to participate in policy making. "Barcelona develops AI- powered platform for citizen

participation - Smart Cities World It is a best ~~venue~~ for ~~partip~~ particip ation. As a result, AI promotes democratic process

To conclude, AI has the ability to play role in every field especially politics, administration and democracy. It has created disturbance presidential election 2016. It has the ability to develop new environment in administration department. It also supports democratic process.
