Topic: Economic Challenges of Pakistan

Unsustainable fiscal deficit, less remittances, rising energy crisis, depleting foreign exchange reserves and devaluation of currency are daunting economic challenges that Pakistan has been facing since its emergence on the world map. These challenges have gained traction due to political instability, uncertainty in civil-military relations, lack of continuity and short-sighted policies of the economists. Pakistan's unchanged credit rating at Caaz is the indication of high probability of default. (Moody's rating, February, 2024). Hence, these are the main stumbling blocks in Pakistan's way to progress.
