

## Passage – 1

One great defect of our civilization is that it does not know what to do with its knowledge. Science, as we have seen, has given us powers fit for the gods, yet we use them like small children.

For example:- we do not know how to manage our machines. Machines were made to be man's servants; yet he has grown so dependent on them that they are in a fair way to become his masters. Already most men spend most of their lives looking after and waiting upon machines. And the machines are very stern masters. They must be fed with coal, and given petrol to

---

machines. And the machines are very stern masters. They must be fed with coal, and given petrol to drink, and oil to wash with, and must be kept at the right temperature. And if they do not get their meals when they expect them, they grow sulky and refuse to work, or burst with rage, and blow up, and spread ruin and destruction all round them, So we have to wait upon them very attentively and do all that we can to keep them In a good temper. Already we find it difficult either to work or play without the machines, and a time may come when they will rule us all together, just as we rule the animals.

PRECIS

Title: Man's Dependency on  
Machines.

Precised Paragraph:-

Our civilization does not know that how to use it's knowledge, as we do not make the best use of Science. Machines were actually made to serve the man. But, man has relied so much on machines that now they have become man's masters. Moreover the machines demand proper care and maintenance and we have to provide it to them because, in future we are going to rely completely on machines.
