RESPECTED SIR

I have tried to rewrite it as you suggested in the previous precis

Precis

A visit to Cherokee

According to the author he wanted to visit an exotic place. His friend gave him the idea to visit Cherokee. So they went for Cherokee and they visited the town Qualla boundary his Indian village showed the lifestyle of 18th century and Qualla boundary showed the Cherokee part to the tourists. There shops were filled with tepees, bonnets and turkey feathers. Author met with middle-aged English speaker George. He invited them for lunch. His story really inspired the author. George told them that Cherokee did not depend on trade but also on other means of income like Bingo weekend. There last stop was Qualla boundary where arts and symbols of Cherokee showed. Author missed that area.

PRECIS

It is in the temperate countries of northern Europe that the beneficial effects of cold are most manifest. A cold climate seems to stimulate energy by acting as an obstacle. In the face of an insuperable obstacle our energies are numbed by despair; the total absence of obstacles, on the other hand leaves no room for the exercise and training of energy; but a struggle against difficulties that we have a fair hope of over-coming, calls into active operation all our powers. In like manner, while intense cold numbs human energies, and a hot climate affords little motive for exertion, moderate cold seems to have a bracing effect on the human race. In a moderately cold climate man is engaged in an arduous, but no hopeless struggles and with the inclemency of the weather. He has to build strong houses and procure thick clothes to keep himself warm. To supply fuel for his fires, he must hew down trees and dig coal out of the earth. In the open air, unless he moves quickly, he will suffer pain from the biting wind. Finally, in order to replenish the expenditure of bodily tissue caused by his necessary exertions, he has to procure for himself plenty of nourishing food. Quite different is the lot of man in the tropics. In the neighbourhood of the equator there is little need of clothes or fire, and it is possible with perfect comfort and no danger to health, to pass the livelong day stretched out on the bare ground beneath the shade of a tree. A very little fruit or vegetable food is required to sustain life under such circumstances, and that little can be obtained without much exertion from the bounteous earth. We may recognize must the same difference between ourselves at different seasons of the year, as there is between human nature in the tropics and in temperate climes. In hot weather we are generally languid and inclined to take life easily; but when the cold season comes, we find that we are more inclined to vigorous exertion of our minds and bodies. Q. 3. Read

Precis:-

Effect of Cold Climate

The effects of cold in northern European countries are very observable. According to Author cold climate work as an obstacle and freeze the energies of people but absence of the hurdle would make no practice of energy. Hot weather gives little motivation but moderate cold has a refreshing effect in which man faces hurdles without dejection. Man has to wear warm clothes, warm clothes, build sturdy houses, fuel for fire, dig coal and walks slowly in the wind and obtain good food on the bare ground in netherland with no danger there is need of clothes, food for sustainable life in these conditions. According to author we live easy life in hot climate but in cold we use energy of our mind and body.

Sir, in the second précis, I was a bit confused whether to write it in past or present Because the teacher with whom we have a class said that if the paragraph uses the past sentence, then we will write it in the past tense, if it is in the present tense, then we will write it in present sentence. Please guide me a little..!!
