

# Is Pakistan Ready for Digital Revolution?

## Outline

### 1)- Introduction

• **Thesis Statement:** Pakistan's digital revolution is under consideration, as positive steps are going on. However, there are many factors, that is still resisting Pakistan's shift towards digitalization.

### 2)- Factors that show Pakistan is not ready for digital revolution

- i)- Major Energy Crisis
- ii)- Growing Political Instability
- iii)- Worst Economic Crisis
- iv)- Scarcity of Foreign Investment
- v)- Digital gaps between Rural and Urban areas
- vi)- Illiteracy in Youth
- vii)- Internet penetration

### 3)- Factors that show Pakistan is working toward shift of digitalization

- i)- Working on Internet Expansion
- ii)- E-Commerce
- iii)- E-Banking
- iv)- E-Courts
- v)- Online Education Platforms

DATE: \_\_\_/\_\_\_/\_\_\_

vi) - Freelancing services

vii) - IT service export growth

4) - Further hurdles, that resist Pakistan's digital revolution

i) - Unfavourable Government policies

ii) - Lack of IT Universities

iii) - Shortage in Digital Financial service

iv) - No Data protection and privacy

v) - Cyber Bullying

5) - Way Forward

i) - Cope with Internet challenges

ii) - Solve security Issues

iii) - Create Business friendly Environment

iv) - Work on Political stability

v) - Deal with Energy crisis

6) - conclusion

## Introduction

Through digital revolution, humans have transferred everything according to their wishes. Slowly and gradually, they have changed this world into a global village. But, as for Pakistan, it is slightly difficult to be ready for digital revolution. A major evidence is that the energy crisis is at worst condition in Pakistan. Day by day political instability is increasing. Illiteracy in youth, unfavourable economic conditions and too much gap between rural and urban areas in facilities are resisting Pakistan from digital revolution. On the other hand, Pakistan is working on internet expansion. It has created e-courts, e-banking, e-commerce and online education platforms. ~~the~~ Despite many challenges, that shows Pakistan is working on its digital side too. However, unfavourable government policies, lack of IT universities and shortage in digital financial services are the further hurdles that resisting Pakistan shift toward digital revolution. Therefore, it can be said that Pakistan is not ready for digital revolution.
