(B) Consequences

- 2.1 (B) Reduction in tax revenue
- 2.2 (B) Reduction in development
- 2.3 (B) Loss of confidence on economy
- 2.4 (B) Adverse effect on countries social fabric
- 2.5 (B) Loss of innovative ideas.
- 2.6 (B) loss of human capital
- 2.7 (B) Psychological impact on country.

3. Conclusion:

Brain Drain: Causes and Consequences

The Essay

A famous statement by the Prime Minister of New Zealand Rob Muldoon in the 1980s commenting on the increasing exodus of New Zealanders leaving the country to work in Australia was, "New Zealanders who leave for Australia raise the IQ of both countries." It means people of high IQ are leaving the New Zealand and going to Australia making the people of Australia a balanced IQ with the New Zealanders. The same is happening with many other developing countries. Pakistan is one of them. The serious causes of brain drain from Pakistan are unemployment, lack of opportunities of skilled labour, lack of respect for professionals, lower pay and service conditions, terrorism, political polarisation, economic crisis and lack of secure environment for business investments. Also brain drain is posing serious consequences for Pakistan like reduction in tax revenue, reduction in development, loss of confidence in economy, effecting the countries social fabric, loss of innovative ideas, loss of human capital and psychological impact on country. Although brain drain has serious causes and consequences for Pakistan yet certain positive measures are needed to stop this menace.
