

The state and the powerful institutions are using law for their interests. Owing to this, the rule of law and democracy is weakened. In the recent decades, it has been augmented. Not only the struggling countries but also well developed countries such as USA; There are plenty of examples which indicate the democracy of the USA. In the recent years, Pakistan is also facing the same crisis where powerful institutions are taking advantages with impunity. For instance, one of the media stars ~~was~~ ~~was~~ abducted four months ago but no one knew who had done this. Even, the police refused for looking him and also agencies were not aware about him. After the four months, when he returned back, no one had asked him about his abduction. However, it was very much clear ~~that~~ from the condition of anchor that he was tortured. Unfortunately, no one cares about it because it has done by powerful institutions. In Pakistan, there is no freedom of expression. Whosoever spoke the truth was abducted and tortured. There are many instances which are frequent, ~~but~~ blatant and egregious with struggling countries. Such as Philippines famous anchor Maria, who got noble prize in 2021 was charged with fake cases because she spoke the truth. Therefore, it is necessary to bring reforms and restore the rule of law.
