City Lahore.

**Subject:** On the evils of education system

Sir,

I want to give the column the  
your newspaper to throw the light on the  
evils of education system. Education is a main  
factor of life but now a days it is becoming  
worse. Many evils are taken birth. People  
take bribery from others just in intention of  
passing their children. Due to this, people want to  
to maintain their status in society. Failure is  
a bad thing near them.

In education system, other than bribery,  
cheating and copying are also become a common  
evil. Students use a short cut to pass in exams.  
They are never wanted to work hard. All time spend  
in gaming and other circus activities. but  
in exam time they rely on short cut which  
is a evil thing.  
Examination Halls are purchase. The marks

Sheets are tempered. Papers are leaked out. Examination system have lost all their credibility. Moreover, examination are the test of student memory not on their ability. But by fixing time like two to three hours are put just to check their ability is also a bad. Due to this, students feel nervous and agitated near the examination. Two years labour is tested in three hours if not good. Due to this, students are involved in bad deeds.

Hence, through the page of your newspaper, I would like to appeal of our country to refrain such code of conduct. So it is high time to educate and aware them of their society. Moral experiences and values must be shared through this platform again and again to amend their society.

Yours Sincerely,  
X.Y.Z.
