

## Passage – 1

One great defect of our civilization is that it does not know what to do with its knowledge. Science, as we have seen, has given us powers fit for the gods, yet we use them like small children.

For example:- we do not know how to manage our machines. Machines were made to be man's servants; yet he has grown so dependent on them that they are in a fair way to become his masters. Already most men spend most of their lives looking after and waiting upon machines. And the machines are very stern masters. They must be fed with coal, and given petrol to

---

machines. And the machines are very stern masters. They must be fed with coal, and given petrol to drink, and oil to wash with, and must be kept at the right temperature. And if they do not get their meals when they expect them, they grow sulky and refuse to work, or burst with rage, and blow up, and spread ruin and destruction all round them, So we have to wait upon them very attentively and do all that we can to keep them In a good temper. Already we find it difficult either to work or play without the machines, and a time may come when they will rule us all together, just as we rule the animals.

# PRECIS

Title: Man's Dependency on Machines.

## ~~Prevised Paragraph:~~

our civilization  
 does not know that how to  
 use it's knowledge, as we do  
 do not make the best use  
 of Science. Machines were actually  
 made to serve the man. But, they  
 has relied so much on machines  
 that now they have become  
 their masters. Moreover, the  
 machines demand proper care and  
 maintenance and we have to  
 provide it to them because, in  
 future we are going to rely  
 completely on machines.
