

Climate Change \approx A Serious Threat to Pakistan

Climate change has now become the biggest existential threat to Pakistan.

An huge devastation occurred due to the this phenomenon. It has devastated and damaged the infrastructure of almost all the provinces to a large extent.

The floods caused due to monsoon in 2022 had caused an huge loss to Pakistan. Attorney General, on Friday, while saying about climate change mentioned "Climate change has become the biggest existential threat to Pakistan".

Pakistan can no longer bear the burden of ^{the} climate change. "If this continues so, may be Pakistan will be removed from the map of world" said by Anatol Lieven in his book "Pakistan a hard country".

While climate change has become an huge problem for Pakistan, the government of Pakistan became more conscious about eliminating

this threat. On Friday 20th 2024, the government of Pakistan formed Climate Change Authority (CCA) and Climate Change Fund (CCF). As climate change is matter of serious threat, it has become obligatory for Pakistan to overcome this issue. Climate Change Act was passed in 2017. Now, it is the need of time for government to implement that Act. The government of Pak. should work with full commitment because it is the matter of whole Pakistan. The floods due to monsoon have devastated fundamental rights of people of Pakistan and also moved them to poverty and dissatisfaction raised in the people. It is the time that the government of Pakistan have to work with full zeal and commitment to overcome such an issue like climate change, for the benefits of Pakistan.
