

Hypocrisy and Double Standards of West

Western attitude has truly been: rules for thee, not for me.

The great American author, Noam Chomsky, once said, 'For the powerful, crimes are those that others commit. The same scenario has been shown by America over the past years for which she has been blamed, but the most dangerous part is that her hegemony is killing the lives of innocent Palestinians. America wanted the world should protest against Russia's invasion of Ukraine on one side, while saying them freedom fighters, but on the other hand, she is complicit in the crime with Israel over the genocide of Palestinians.

West Supporting Monster Israel Stance of European Union as Allie of Israel:

Since the Russia's invasion on Ukraine, Europe flung its doors open for elites of Ukraine and saying them more than welcome, while shocking the

refugees of Syria, Afghanistan and Iraq.
US Supporting Israel.

US, being the strong supporter of freedom of speech, standing out for the white-skinned freedom fighters of Ukraine, giving aid to Israel and supplying them weapons for the genocide of innocent jihadists and Palestinians and manifesting their grudge for Islam and Muslims.

The world watched in horror, when US raised her voice for Ukraine over the "Bucha Massacre" and called the bombing of Mariupol hospital, an outrage to the world, while remains silent over the devastating damage of hospitals in a row, in Gaza.

Moreover, US is frequently using its veto against Palestinians in the International Court of Justice in Hague, and showing its hegemony by opposing the promising environment of the court and United Nations Security Council.

Germany; A strong Ally of Israel:

Germany rushed in ICS to defend Israel and to repeal the allegations definitely being committed by Israel over the past years and still are on going.

Hypocrisy and cruel attitude of west for muslims is being shown to world many times. West stood for support for so called freedom lovers of speech, showing the cartoons of our beloved Prophet (PBUH), and calling muslims terrorist in Syria, Libya, Iraq, Afghanistan, Kashmir, Palestine etc.

Germany and European Union also adopted the stance of import banning the import of Russia (an oil embargo) including ban on trade, banking, assets, Russia's channels in Europe, also cancelling the concerts of Russian musicians, revoked their authors, writers and filmmakers in Europe and Germany. A clear contrast in both the conditions.

Conclusion:

World demands a quick action over the genocide and war in Palestine. and is in a dire need for reforms in United Nations to take a step for the membership of Palestine while making Israel condemnable.
