

AI: A potential threat to mankind?

(Brainstorming)

- Job displacement
- Ethical concern
- Lack of understanding / control
- Autonomous weapon
- Surpassing human comprehension
- Controlling / regulating advanced
- Economic inequalities
- Disparities in access to AI edu & resources.

Outline.

1. Introduction.

1.1 HOOK.

1.2 Background info / Supporting sent / General State

1.3 Thesis Statement: Artificial intelligence has a potential to threaten the mankind due to several reasons; Data privacy, Job displacement, Dependence on technology, Ethical concerns, Lack of communication

2. Main Body.

2.1 Data privacy

2.1.1 NO privacy in Health care (Patient privacy)

2.1.2 NO privacy in education (Student data)

2.1.3 NO privacy in marketing (customers)

2.2 Job Displacement

2.2.1 Robots are replacing humans

2.2.2 Economic inequality

2.2.3 less jobs in industries

2.2.4 lacking in transportation no liability in the

2.3 Dependency on Technology.

2.3.1 making Human lazy (less usage of Brain)

2.3.2 Reducing the need of physical labor (Hob for future generation)

2.3.3 Reducing critical thinking (less problem solving skill in students)

2.4 Ethical concerns.

2.4.1 Lacking emotions (no team management)

2.4.2 prioritizing financial gain over ethical considerations

2.5. Lack of communication.

2.5.1 No Creative thinking

2.5.2 leading to misunderstanding.

2.5.3 Lacking exposure to diverse perspectives.

3. Conclusion: Hence, the problem with Artificial intelligence is that it's artificial - a product of humans - which lacks authenticity, emotion, data privacy, and ethical concerns.
