

Overpopulation is one of the reasons for food shortage:

Overpopulation is another reason ~~for~~^{cause} food shortage. The reason is that population is greatly increasing every year but the means of food production remain the same. In other

words, the rate of population is higher than the rate of food production which leads to the food shortage. According to FAO, the world food production needs to increase by 70% to feed the world population in 2050. This shows that overpopulation is also one of the reasons for food shortage.

Nuclear challenge to world peace during the 21st century.

The world peace is facing a significant nuclear challenge during the 21st century. The world's super powers are continuously procuring nuclear arms and heavily spending on their militaries. According to the annual report of Sweden-based think tank Stockholm International Peace Research Institute, global military spending last year was \$2.4 tr, with the figures projected to grow. As per the report, the US was the top defence spender (\$916bn), while China, Russia and India followed. Moreover, instead of de-escalating, global powers are fueling confrontations. For example, the US has just approved a multi-billion dollar aid package for Ukraine, Israel and Taiwan, with military components. This shows that world peace is in great danger due to nuclear challenges. ~~in the 21st~~

Negative effects of social media on youth.

Time-wastage is also one of the negative effects of using social media especially in youth. The reason is that social media apps are designed to grab attention and keep people hooked as long as possible. These companies are continuously improving and becoming better and better to keep people hooked because that's how these companies make money. The youth is the most vulnerable segment of society that can be easily manipulated by these

giant corporations and end up
wasting hours and hours of their time
on these platforms. For example,
a Gallup survey of more than
than 1500 adolescents shows that over
half of the U.S.A. teenagers (51%)
reported spending at least four hours
per day on a variety of social media
apps such as YouTube, TikTok, Instagram,
Facebook and X. To conclude, social media
usage is a leading cause of wastage
of time in youth.
