

## BRICS AND DE-DOLLARIZATION:

The international community anticipates the reconfiguration of the world economic order witnessing substantial BRICS expansion. BRICS ~~are~~ dedicated manoeuvres are not just directed towards the mitigation of US dollar's hegemony. The supplantation with the local currencies <sup>for</sup> beyond oil trade transactions and the objective to surpass G7's 45.9 trillion \$, reconstructs the global financial landscape. The endeavours of BRICS contributed collective GDP of \$30.8 trillion and 29.3% of global share creating a predominant position for it in the

global fiscal topography.  
Conclusively, BRICS  
promotion of de-dollarization  
will change this topography  
leading to multipolar  
financial global economic  
order.
