

# Education For Grammar

On Wednesday, the prime minister announced an education emergency at a conference in Islamabad. Through post-18<sup>th</sup> Amendment, education has been a provincial subject, the prime minister said emergency was for the country and he would work with all your provinces. All the chief ministers of provinces were there in the conference.

About 26.2 million students are out of ~~the~~ school, between the age of five to sixteen years. For those in the school has provided a lack of quality education. Quality of education depends on the student's parental income. One can get quality education, if his parents are rich enough to pay private school expenditures.

In the Article 25A, ~~was~~ mentioned "free and compulsory" education for the children of age five to sixteen. It is mentioned with the basic rights of human in the Constitution.

Emergency means in one's dictionary is "a serious situation, unexpected."

needs immediate action. Education in our country is a serious problem and needs immediate appropriate action.

There are 100,000 schools in the domestic sector of the country and 2 million teachers. The total number of teachers is almost 2 million. So, we are talking of the large system. Reforms of a large system require large and deep interventions. Small initiatives here and there, as government have been taking, but it will not address the issue of 26.2 million out-of-school children and the quality of education for millions who are in the school.

We need more schools and teachers. For quality education, we need to change or revise syllabi and promote teachers training. We need to train our teachers to focus on students' practical <sup>(learning)</sup> work rather than focusing on the theoretical cramming system.

It is the responsibility of ~~our~~ teachers to build the creative thinking and problem solving abilities in the children. Students who are learning in the private sector and those who are studying from government schools, there is a huge difference present <sup>among</sup> between them. The most important factor is medium of education. In Government schools, children have been facing ~~an~~ issues in learning new (things) <sup>skills</sup> because of this language barrier.

The teachers in the Government schools, they only go to school to complete their duty. They have no concern with the students. Moreover, in small cities they bring these vegetables with them to cook (it), with the help of students for their dinner.

So, we need proper governance in the public sector. ~~Because~~ <sup>As</sup> Youth is the real power of the country. Our government should take large initiatives to solve the problem of the youth.
