

"BLA" → Attacks becoming more intense.

The insurgency of terrorism has ^{been} persistently increasing day by day. Terrorists are not only attacking security but also Chinese who are living in the Pakistan. The reason behind attacks on Chinese is the project of CPEC which is very much important for China but it is continuously under threat from Balochistan Liberation Army which aims to focus on efface of CPEC. It is one of major challenges for Government because they have been ~~active~~ especially active in the Makran region and nearby areas, carrying out many attacks in places like Keeh, Gwadar, Panjgur and Kharan districts. This all started after the attack on Ziarat residency in 2013. After this attack, many youth have joined them. With the passage of time, their insurgency have increased to new areas. The government tried different strategies to deal with terrorists such as offering them rewards if they will surrender themselves. But it ultimately failed because they came for taking money and returned to same thing which impacted the country. Now, the government is bringing shift in ~~the~~ its policies. In previous, Government was offering them peace but now, Govt will use force in order to efface terrorism from Pakistan. Therefore, It is necessary to bring radical shift in policies.
