- ii. ~~Improving~~ economic conditions.
- iii. ~~Improving~~ job opportunities.
- iv. Enhancing educational and training opportunities.
- v. Encouraging innovation.
- vi. By political stability.

## 6. Conclusion

The "Brain Drain" phenomenon has a long history. In 1963, the Royal Society defined "brain drain" the exodus of British Scientists to USA, seriously jeopardizing the British economy, but this term eventually became of common use to describe the emigration of scholars and professionals from the third world countries. Because of the migration the investments made by these countries on the formation of their nations were used by the developed countries: the result was an unjust technological aid to the richer countries by the poorer ones.

We should save skilled human resources for the better utilization of natural resources.

Youth are not useless they are used  
"Less" they are not careless they are  
cared "Less" — Sami Chinnmayamanda.

The brain drain from Pakistan has a long history. During the 1950's to 1990's many skilled professionals and intellectuals left Pakistan due to political instability and economic uncertainty. Infact this trend continued throughout the 1990's upto the end of 20<sup>th</sup> century and even now persists.
