	Explore nature vs nurture debate in gender studies?
	Introduction:-
<u> </u>	
	The nature vs nurture debate
<u></u>	is a question of whether human
	behaviour is determined by biology
	or wy intervitomental in pactors in Other the in d
	side of nature, people believ that
	human characteristics are rereditory. that
	they are carried our genetic
	code. On the ide of nurture, people
	believe that human minds are
	like a blank slate, that psychological
	characteristics are influenced by
	one's environent.
	Noture debode in gender studies.
	It suggests that genetics hormonal
	and neurobiological elements play
	pivotal role in the construction
	of gendered related traits.
	- marbare selled sill of
-2.	Treaties supporting nature debate.
	There are many theories that support
	noture debater
<u>a.</u>	Prenatal Hormone theory.
	Prenatal exposure
	to hormones like testosterone and estragen
Calcords, as the	is believed to play an important role
	in the development of genderi
A CONTRACTOR	Example: Studies have shown that

____/202 Day:___ Hyperplasia (CAH) , particularly upoment , tend to exhibit behaviours pland when interests that alignmore closely with mascui traits This is an scientific evidence for nature debate. b. Organizational activational hypothesis: The organizational - activational hypothesis the role of early hormonal stresses influences on behavior and development This hypothesis aligns with the idea that biological factors, sperfically hormonal exposure dung sensitive such as prenatal development periods have lasting ports behaviour on and brain organization. It suggests that these early organizational effects contribute substantially to an individual's later behavioral patterns. c Minefelter syndrome: klinefelter syndrome is a genetic condition where males are born with an extra X chromo somes (XXXX Minstead, 10,62 1. Hypical xY). Individual with the syndrome might experience varians in physical traits (such as taller stature, les rody hair , and infertility). They can potentially have different patterns of cognitive

_____/202 Day:___ gender roles across various cultures and societies. Example : In the early to mid rath century societal norms often dictated that men are the primary bre winners while women were expected .: Hame stay at home and take care of the household. However with world war is as is men went off to fight women entered the workforce in large numbers taking on job traditionally held by men Reinforcement of gender roles by family and peer groups'r Family and peer groups often reinforce gender roles through various means such as socialization expectations etc. Familie and peers ofter have certain expectations based in on gender this can involve thous one dresses, behavior even Career choirer Example: and weather brank From a young age children observe and learn behaviors, norms, and values associated with their gender from their and friends. For instance by might be encouraged to play with toy threadspin 3.5 while girls are given dollar and manual of c. Cultural beliefs plage a crucial role:

_/___/202 Day:___ Caltural values and beliefs significantly shape the development of gender identities. Across various cultures i distinct expectations prime men and women influence how individuals perceive and unerstand different gender roles Example:astern countries there In some middle are values and beliefs surrounding modesty and dress codes. These norms indicate not worken chould dress modestly by covering their heads while have less strict dressing rules. of media in constructionsim: olo Mediah. representation of gender can reinforce gender roles and stereotypes. Media portrayal can shape how people perceive and adapt under rolls. Example: Advertisers ofter reinforce gender roler by predominantly featuring women household product ads and mebacz is automotive industry commercials, shaping societal expectations regarding expected gender roles. Add more arguments in this part 2.5 Conclusion:-Experts agree that most human traits have boll genetic and environental comments. In fact nature and number often work
