Throughout the ages of human development men have been subject to miseries of the throughout the ages of human development and, those that human beings misming. Throughout the ages of human development, and, those that human beings misguided kinds: those imposed by external nature, and, those that human beings misguided kinds: those imposed by external nature, and other At first, by far the worst evils were those that were due to the control of the kinds: those imposed by external nature, and, the worst evils were those that were due to the inflicted upon each other. At first, by far the worst evils were those that were due to the inflicted upon each other. At a rare species, whose survival was precarious. Without the contract of inflicted upon each other. At first, by lat the transfer due to the environment. Man was a rare species, whose survival was precarious. Without the environment. Man was a rare species, whose survival was precarious. Without the environment and continue to the environment. environment. Man was a rare species, whose against the monkey, without any coating of fur, he has difficulty in escaping from wild against of the world could not endure the winter's cold. He had agility of the monkey, without any coating of the world could not endure the winter's cold. He had only beasts, and in most parts of the unright posture freed his hands, and intelligible beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in most parts of the world could be beasts, and in the world could be be beasts, and in the beast set of the world could be be beasts, and in the beast set of the world could be be be beasts, and in the beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be be beast set of the world could be be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be be beast set of the world could be be beast se two biological advantages. the taping in the two advantages gave him to transmit experience. Gradually these two advantages gave him enabled him to transfirst experience. Save him supremacy. The numbers of the human species increased beyond those of any other supremacy. The numbers of the fitting supremacy. The numbers of the fitting supremacy. But nature could still assert her power by means of flood and famine large mammals. But hattire could but a specific and pestilence and by exacting from the great majority of mankind incessant toil in the and pestilence and by exacting its and good our bondage to external nature is far diminishing, as a result of the growth of scientific intelligence. Famines and pestilence still occur, but we know-better, year by year, what should be done to prevent them Hard work is still necessary, but only because we are unwise: given peace and co-operation, we could subsist on a very moderate amount of toil. With existing technique, we can, whenever we choose to exercise wisdom, be free of many ancient forms -of bondage to external nature. But the evils that men inflict upon each other have not diminished in the same degree. There are still wars, oppressions, and hideous cruelties, and greedy men still snatch wealth from those who are less skillful or less ruthless than themselves. Love of power still leads to vast tyrannies or to mere obstruction when its grosser forms are impossible. And fear-deep -scarcely conscious fear — is still the dominant motive in very many lives.

Nature of human Suffering: Internal and External factors Throughout the ages of human developments both internal and external factors contribute to human suffering. The survival of humans in an external environment is more challenging compared to other species. Their posture and intelligence enabled him to earn bread and butter. Overtime, the burden of external factors decreased. Addressing natural disasters, diseases and food shortages required a little effort. The deterioration caused by internal factors still exists. A humanbeing still fights over wealth and take advantage of those less skill ful. The pursuit of power leads to oppression and tyranny, greatly impacting Individuals lives.
