

Israel-Palestine Conflict.

The conflict between Israel and Palestine is one of major issues which need to be discussed and resolved. This started in early October when Hamas attacked the Israel. Israel claimed that many innocent, including women, and children, had been killed. In the response, Israel started brutal killing of Palestinian in Gaza. It has been almost 7 to 8 months but Israel is still committing brutal acts. As a result, many thousands of the people have lost their lives. It is time for global powers to assuage the conflict, but it seems that global powers have not decided to act immediately. The USA who claims to maintain peace and harmony is also providing unconditional support to the Israel. Not only this but also the USA had vetoed many times when this issue went to the platform of United Nations. Instead of expressing disapproval for genocide, the USA has provided billions of aids to Israel. Israel also mentioned that it would not stop until the complete eradication of Palestinian. Also, many students from various countries have been protesting for genocide. Unfortunately, they have been negligent by their rulers. If it goes like this, there will be no peace and harmony in the world. Hence, it is necessary for global powers to act immediately and pacify the situation...
