**Passage.**

Up to a point the Second German War resembled the first. Each began with a German bid for power which almost succeeded in spite of the opposition of France and Great Britain. In each the United States came to the rescue after year of neutrality. Each ended with a German defeat. But the differences were easier to see than the resemblances. The powers were differently grouped: Italy and Japan were on the German side, Russia was neutral until the Germans attacked across what had been, to begin with, Poland and Baltic States. The second war lasted even longer than the other. It pressed harder on the civilian population. After a period of restraint, perhaps, intended to conciliate American opinion, both sides dropped bombs from the air, without respect for the nature of the targets, wherever the officers concerned expected to cause the greatest effect. In Great Britain 60,000 civilians were killed. Though the Island was not invaded, the population was more directly involved than it was in any former war. Children and others were evacuated from towns into the country. Food supplies ran so short that, at the worst, even potatoes were rationed. Of all the states opposed to Germany, Great Britain was the only one which fought throughout the war. The resources of the nation were concentrated in the war effort more completely than those of any other nation on either side. Labour for women as well as men, became compulsory. Nevertheless, once the war reached its full severity in the west, eight months after it was declared, there was less disunion between classes and interests than in any other five years within living memory. Fighting spread all over the world. The Pacific was as vital a theatre as Europe. Scientists, especially Physicists, made revolutionary discoveries during the war, not only in the fields of weapons and defense against them, but in supply, transport, and control in action. Strange to say the fight services suffered fewer casualties than in 1914-18: 300,000 of the armed forces and 35,000 of the navy were killed. There was nothing like the trench warfare of former war, though there was almost every other sort of warfare, from mechanized war of movement in the North African desert to hand to hand jungle fighting in Burma. Both sides experimented and built up stocks for gas warfare and biological warfare, but neither side used them. (George Clark: English History: a survey)

## World War-2 (Title with Marker)

World War-1 pushed Second German War. Germany started each to influence the world and ~~which~~ almost got victory in spite of strong opposition. The USA ~~in each~~ <sup>each time,</sup> came to rescue alliance after <sup>years</sup> year of neutrality. Moreover, USSR joined the war after the <sup>German</sup> attacked its territory. The WW-2 continued longer than WW1, but both ended with the defeat of Germany. Both sides bombed targets without respect for the civilians. This resulted in huge number of <sup>deaths</sup> civilians deaths, displacement and food insecurity. Moreover, Great Britain competed throughout war and utilised all its resources ~~than other states~~. When, the war spread worldwide, the Physicists made enormous discoveries in the sector of defence and transport. These discoveries contributed in the mass killings of troops and civilians. Both the sides made made toxic weapons but neither used them.

Idea is generally ok. Mistakes identified.
