too	
Artificial intelligence has great	
potential in spreading good in	
various field puticularly in the social	
domain Despite having perception of Al	
as inherethy in the it proved to be	
as inherently negative, it proves to be	
beneficial. The immense advancement of Al	8
is the decisive factor of Al as an	
excellent helpe According to Kai- Fu Lee,	-
"Al can improve human efficiency,	_
optimize resource allocation, and address	V
optimize resolute issues, from education	
pressing social tistles, from considering to healthcase. Accordingly by considering	
pressing social issues, from education to healthcase. Accordingly by considering to healthcase sole of Al in education,	
the optimistic role of Al in education,	
health, and environment, the ovall godne	
health, and	

A) is observed. For instance, it helps priorities learning paths of students, foster inclusivity, and broadens multillacontent delivery in education Moreover, in the field of health, the beneficialies of Al is perceived in envisonment detection of high risk patients, and its assistance in biodiversity -per preservation are some of the defining indicators directly the world's thought to positive A. However, in navigating the potential advantages could not be ignored the potential through in terms of sociatal discrimination and overall threat to human survival are some Mallenges hindering its smooth progress None Heless, various indicates are present to nullify , or at least reduce the danger of Al, like accountability mechanisms through Al ethicist. Conclusively, Al has the ability to make strost success in the social domain provided -that its challenges are tackful sagaciously. Undoubtedly, the great risk is associated with Al which have masked

its capability as the beneficial for human beings. Such negative perception includes the threat to human survival in the the form of economic inequality ethical concerns and discrimination and biasa. Moreover, the uncontrolled deployment of Al in the military domain risk on the existence a huge mankind. These highlighted schemes of the excellency associated with A. Therefore, it is highly recommended to depit both sides of conclusion. the issue before coming to the In exploring the positivity linked with Al, the providence of learning path to the students in education sector tops the most. It utilizes Al- powered algorithm to soit out students queries and promotes the path of learning. For example, Dream Box adapts the curriculum to match each stodents' pace and comprehension level, provided targeted interventions and support. It not only prioritizes the learning path for the students but also targets the traditional curiculum applied

pupil inespective of his meetal capability. Therefore. All how revolutioned the education bector in this cours In addition to specific curriculum, it helps festiving inclusivity by adaptive accessibility features by inculcating the features of text to speech and text. speech to text functionalities, it encourages the approach of education to diable features in this domain is the Microsoft Immersive Reader a specification 9 Al to include people with disability in the field The application is integrated into Various microsoft services like Microsoft wirel, one Note, outlook, and Teams of in quite home- phial especially for the poor vision people to accost information in any field thus, it is not wary to say that the total a role in amplifying the social goods.
