AI : A Potential Threat to Mankind

Brainstorming

Pros	Cons
1. Increases productivity as a supplementary tool	1. Threatens several jobs.
2. Huge opportunity in defence	2. Makes war more inhumane a) IDF's Lavendar AI in the Gaza war
3. Reduces human error a) Breast cancer detection	3. Output depends on training data

4. Daily life applications
  a) AI search engines
	4. Expensive AI chips
	  Debates around authenticity
	  a) Deep fakes c) "AI hallu-cinations"
	  b) Trained on human works.

5. 24/7 available worker	5. Large Language Models (LLMs) are not "true" AI a) Common Chatbots e.g ChatGPT & Gemini

It does not make any sense

Outline

1) Introduction

1.1 Attention grabber : In January 2024, AI was a key theme at the World Economic Conference, billed a major driver of the economy. Few days later in the US, voters in New Hampshire recieved a call from Biden urging them not to vote in the primaries, a call later revealed to be an AI Deepfake.

1.2 Summary

1.3 Thesis statement : AI has become fueled economic optimism around the globe but the threats it poses to several jobs, as a heartless weapon of war, and the impartiality of its outputs is cause for concern. Moreover, AI raises concerns for authenticity in a world already struggling with misinformation, as well as LLMs being marketed as AI when they are not "true" AI.

Work on your grammar plz

2. ~~Understanding AI~~

2.1 Brief explaination of AI

2.2 Brief introduction to current AI players

e.g OpenAI's ChatGPT, Google's Gemini

3. Pros of AI   *Prose of AI*

3.1 A tool to increase productivity

3.2 Huge opportunities in defence & security

3.3 Several opportunities in healthcare

 a) AI Breast cancer detection

3.4 Reduces human error

3.5 Daily life applications

 a) AI search engines

 b) Smart AI devices

4. AI as a Threat to Mankind

4.1 Threatens several jobs

4.2 Makes war more inhumane

 a) The IDF's Llavendor AI surveillance

  used in the Gaza war

4.3 (Breeds) Potential for mass surveillance

  Reinforces bias

4.4 ~~Output depends on training data~~

 b) Racial and gender bias of

  training data is reinforced.

4.5 Raises debates around authenticity

   a) Trained on human works

      i) Image generators accused of plagiarising real artists' work

   b) Deep fakes

      i) Biden's AI voice deep fake in US primaries

      ii) Cybercrimes

   c) AI hallucination — made up information presented as fact by AI chatbots.

4.5 Questions of whether Large Language Models (LLMs) are "true" AI.

   a) Common Chatbots e.g. ChatGPT & Gemini — predict the "next word" rather than ~~generate~~ "thinking"

5. Conclusion

5.1 Thesis statement

Phrase formation is fine
