Keep practicing on different themes/topics

increasing exports, promoting tourism, introducing digital revolution are also need of the hour. Further, by reducing political polarization and focusing on national interest could make a huge difference. Establishing good ties with neighbouring countries is also very important. As Pakistan is also facing environmental problems, so improving and introducing good adoption measures is an essential step towards prosperity. For development improving and upgrading agriculture sector is important too. Focusing on women education and empowerment could turn Pakistan's dream into reality. Although the current state of Pakistan looks dismal, but pathways implementation could translate bleak Pakistan's prosperity into bright one. For that, robust implementation is need of the hour.
