

Precautionary Measures to Tackle the Rising Issue of Smog in Pakistan

Thesis Statement:

"The government of Pakistan must fully implement and strengthen precautionary measures, including mask wearing, indoor activities, air purifiers, reduction of vehicle emissions, and artificial ~~intelligence~~ rain to effectively address the severe smog crisis, which has reached unprecedented pollution levels."

Paragraph:

Pakistan is facing a severe smog issue, particularly in Lahore City, where pollution levels have broken all previous records, making it the most polluted city in the world. To tackle this issue, the government of Pakistan has adopted various precautionary measures, such as wearing masks, staying indoors during peak smog hours, using air purifiers, reducing vehicle emissions through electric/hybrid vehicles, implementing industrial reforms with pollution controls and cleaner energy, and promoting sustainable farming practices. Additionally, the government of Punjab started doing artificial rain today that might reduce the ongoing smog. Punjab Chief Minister Maryam Nawaz praised the

effects of the involved departments, stating that the successful experiment marked a historic achievement for the province. Thus, it is pertinent for the government of Pakistan to fully implement all the precautionary measures in order to tackle the rising smog crisis.
