

Essay: Artificial has revolutionized the world

8-11-2024

Outline

I Introduction

Thesis Statement: Undoubtedly, Artificial Intelligence has revolutionized the world through providing unexpected opportunities in every field including technological, economic and medical field. Although it poses some challenges, with introducing robust initiative, it can provide a lot of advantages.

II. What is Artificial Intelligence?

III. How AI has revolutionized the world?

1. AI provides self-driving cars
2. Its applications are available twenty four hours
- ③ - It provides robots which help in house work
- 4 AI enhances all the products and services in business market

- 5 It creates a lot of jobs along with high salaries
- 6 It reduces human error
- 7 It facilitates in transport through application
- 8 AI has the ability to diagnose patient at early stage in medical field
- 9 It helps in natural disasters
- 10 It builds new application to Learn education.
- 11 It has the ability to identify objects in images

IV- How AI poses serious threat to world ?

- 1 It creates new drones in military field
- 2 It replaces human in employment

V What measures can be taken to mitigate these challenges?

- 1 Effective Laws can convert it into advantages
- 2 Strong governance can mitigate its threat

VI Conclusion

Industrial revolution of the 18th century is credited with the entire progress. It generated numerous inventions which facilitate human in multiple field. Computer is the greatest invention of all times. Man is always striving to enable it in decision making without human intervention. Gradually, he made Artificial Intelligence (AI) which provide a lot of benefits. Undoubtedly, AI has revolutionized

the world through providing unexpected opportunities in every field including technological, economic and medical field. Although it poses some challenges, with introducing robust initiatives, it can provide a lot of advantages. This essay will provide an imperative knowledge about topic. Defining the concept of AI, this discussion will turn into importance of AI which has revolutionized the world. There is no denying the fact that it creates unprecedented application where humans are speechless. It introduces numerous new opportunities like self-driving cars, 24 hours availability, house work robots and faster surgery systems. After that the dialogue will move towards highlighting the threats of AI. Finally, this essay will provide robust solution to mitigate these challenges.
