Globally, education is considered as a vital factor. Moreover, many world countries have made progress due to education, which leads to technological and science development. However, education also faces certain troubles, especially in developing states. These hurdles are impacted significantly to education. Thus, education system needs certain reforms, which lead to significant improvement in education system. It is not only by ~~improvement~~ ^{by} ~~improvement~~ access to quality education, but also by equity in education. Further, it also ~~imp~~ ^{imp} could also improve by upgrading schools and better learning resources. Additionally, the implementation of training programme could improve education to a large extent.

Thesis statement: The education system would improve by reforming, upgrading schools, quality education and implementation

of teacher training programme.

To start with, A access to quality and equity in education, is the most vital reform in education system.

In fact, the quality education impacts sig positively to education. Thus,

It causes to increase enrollement

rates. Secondly, it improves teacher training, and improvement in curriculum

for instance, Pakistan has implemented

the national education policy (NEP)

In 2017, This programme was introduced

to improve quality education, it leads

to improve education by increasing

enrollement rate, and teacher training.

consequently, a clear trend emerges links

enrollement rate with education system.

Finally, the education system improve by

quality education.

To upgrade school and better learning

resources, Furthermore, another reform

in education system. In fact, school

are considered building block of

of education, to upgrade school's system accelerates education progress. firstly, it focus on bridging the gap between urban and rural areas. Secondly, all children have access to quality education regardless of their socio-economic background. for instance the govt of Pakistan has initiated prime Minister's education Reform programme and the education sector reforms to improve infrastructure. These programme were introduced to enhance educational activities which ~~a~~. This leads to accelerate education regardless of socio-economic. consequently, the education system reformed by upgrading the school system.

To revamp curriculum, similarly, another educational's reform. In fact, less progress is due to old and irrelevant curriculum. Furthermore, we should make it more relevant and responsive to the needs of the 21-century workforce. Thus,

It causes to enhance intellectual level of students. For instance, the inclusion of Artificial Intelligence in education system, accelerates technological and educational advancement. Furthermore, it has an involvement of students in such activities accelerates intellectual level of student to a great extent. Moreover, it leads to technological advancement. Consequently, an advancement in technology links the education system. Thus, education system is improved by upgrading ~~curriculum~~ curriculum.

Simultaneously, another reform is the implementation of teachers training programme. In fact, teaching methods largely influences education. Furthermore, good teaching ~~methods~~ lead to enhance the skills and competence of educators. For instance, William Arthur Ward stated that "the mediocre teacher tells, the good

teacher explains. The superior teacher demonstrates. The great teacher inspires" This which emphasize the an importance of teacher skills, and their role for a increasing education standards. therefore, education system is improved by teacher training.

The last but, not the least, partnership with international organizations and donor agencies also require to support education. In fact, international organizations help education system by providing financial resources further more, This partnership proves very helpful in many forms. It causes to mobile resources and expertise to support education. for instance, the world Bank strategic thrust, and network of International Education Association (NIEA), among the world institute, which provide financial assistance to educational institute. consequently, education system is improved

by International organization's financial assistance.

To cut the arguments short, the education system is improved by certain reforms. therefore, it is reformed not only by increasing enrolment rates, and teacher teacher training, but also ~~but~~ also by accessing to quality education regardless of their socio-economic background. Furthermore, the education system is reformed by enhancing intellectual level of student, by update curriculum. Similarly, to enhance the skills and ~~curriculum~~ ~~to~~ competence level by the implementation of teaching programming. therefore, by ~~implementing~~ all these reforms causes to upgrade education system, according to the needs of the 21st century.
