Q. Write a precise of the following passage and suggest a suitable title.

Urban Green Spaces: Balancing Nature and Urbanization

Urban Green Spaces, such as parks to provide a peaceful environment from city life, offering a sanctuary for wildlife and supporting community connections.

These spaces are venues for social gatherings, cultural events and recreation, enhancing urban life. Additionally, they improve air quality, reduce the heat island effect and support mental health by offering places for relaxation. However, maintaining these green areas throughout growing urbanization requires sustainable planning to ensure cities balance human and environmental needs.

The goal is to integrate nature into urban landscapes, promoting both human well-being and ecological harmony.
