

Topic: Does poor economy always ~~in~~ negatively impacts education of country?

1. Introduction:

2. Relationship Between economy and education

3. Poor economy always adversely affects the education (Thesis)

a) Budget constraint leading to less spending in education sector

b) Lack of modern infrastructure and facilities for students

c) Less fiscal space for ~~research~~ developing research culture in education institutions

d) Difficulty in maintaining and reconstructing schools if hit by natural disasters

e) Insufficient investment in updating the curriculum according to the current needs

f) ~~Low~~ Staff having low salary ~~do~~ often engaged in bribe

h) Low salaries of teacher results in low motivation to provide their best

4. Education may not ^{always} be the worst hit of poor economy (Anti Thesis)

a) If education is priority of country then the required investment will be made despite sluggish economic performance

b) Right strategy and policy matter more than funds.

c) Many developing countries still manage to provide free education

e) fiscal constrain invites to innovative ~~and cheaper~~ ideas

5. Education may not always be the worst but surely worst hit of poor economy (Synthesis)

c) In poor economies, the priority is to survive first

- b) Efficient policy making requires thorough research and data collection which will only be possible if sufficient monetary resources are available
- c) The standard of free education in developing countries is not very high
- d) On a larger or national level, innovative ideas require monetary support for implementation.

6 - Conclusion
