4- Conclusion

of Islamic  
Independence. After the war of 1857, the British ruler faced another religious controversy in India; the custom of satti which means burning the widow alive with her deceased husband. The administration sought advice from the Governor General of that time. The Governor General advised him to open schools in all those areas where the customs of satti was practiced. At that time nobody took it seriously as an immediate solution but the orders were obeyed. Schools were started in all those areas and children started taking education. After 20 years, they abandoned the practice of satti themselves. What did the classrooms in schools do? They changed the mindset. The purpose of education and classrooms is to change the mindset. Classrooms decide the future of ~~ed~~ nation by developing their critical thinking and problem solving skills. Classrooms

remove biases from young mind, classrooms ~~remove~~ ~~sees~~ promote gender equality in society. by giving equal rights to both men and women. It also shape young minds by giving them right direction in their future. Classrooms also face many obstacles like lack of skilled workforce and inadequate availability of resources and these are many ways to make a classroom a better place so that ~~individual~~ <sup>classrooms</sup> can shape an individual which would transform the nation. By fostering a supportive and stimulating learning environment, classrooms can empowers students to become active contributors to their nation's growth.
