

Distance education learning in Pakistan: Opportunities and Challenges.

1 Introduction :-

Thesis statement :-

Distance education learning is the new method of learning in the 21st century. Pakistan has many opportunities of distance ~~education~~ education learning but there are some hindrance in the way. It can be addressed by government and public efforts.

2 Distance education learning opportunities in Pakistan:

i- Online education learning is cost effective.

• Example Save hostel rent and transportation cost

ii- Student can learn different courses.

— U-tube source of dif courses.

iii Student^{can} learn from global level teacher.

Pakistani student can learn from British teacher

iv Online education is very flexible

V- Online education is ~~environment~~ friendly.

- Environment protects from transport's gas emission.

3 Distant education learning challenges in Pakistan:

i- Blockage of mobile phone signals and weak internet.

- In August - 2024, Internet was too weak. Dawn

ii- Far areas is deprived from internet facility.

- Ex Fata and far areas of Northern KPK

iii- Illiteracy high rate in Pakistan.

- Census 2023, 38% Pakistan people illiterate and misuse of technology.

4 How can ~~improve~~ solve distance education learning problems in Pakistan?

i- Promote illiteracy rate and positive use of technology.

ii- Invest on internet sector
for strengthen internet.

iii. Government should ~~expand~~ available
internet facility to far areas.

Conclusion

Before online learning education, people had only one way of education learning which ~~was~~ was traditional education learning. Now, people has two opportunities of education learning: i- traditional and online education learning. Online education learning is very creative in the 21st century. Pakistan has many opportunities: online education is most effective and student has different courses ^{opportunities} which can be learnt through online education. Online education is flexible. Student can learn

when he free his work.
Online education is also
environment friendly. There
is also some challenges
in the way of online education
learning. In Pakistan internet
speed is slow and government
off the mobile signal due
to security reason. ~~Pakistan~~
~~has~~ also far areas ~~has~~
deprived internet facility in
Pakistan. Many Pakistani
are also illiterate that
reason they do not about
usage of technology. These
weaknesses can be corrected.
If government promote
literacy rate and aware
people about technology.
Gov also make policy regarding
internet communication, while
investor invest in internet
communication sector, and
government should available
internet facility in far
areas. ~~to~~, ~~when~~ ~~govern~~
Hence, Pakistan has
many opportunities, but
there is also challenges

In the way of online education learning. It can be mitigated by government and public efforts.
