

ISSUE with Pakistan education system.

Education is very important for country's socio-political and economic growth. Education refers to the knowledge of objects, relation and connections within the universe, which gives meaningful life to the people. If the education system is flawed the nation would never progress.

Similarly, Pakistan is facing significant challenges ~~of~~ in its education system. On the basis of learning, it focus on theoretical rather than practical, ineffective teaching methodology and assessment criteria, No career counselling after secondary level.

Moreover on institutional basis, lack of policy implementation, poor management and supervision of the schools and staff, lack of adequate budget and poor physical facilities, Education has become directionless profitable

business. Furthermore, impacts of the ineffective education system on Pakistan. Lack of human resources development, nonexistence of inventions, out of school children and, eventually, child labour. Ways to overcome challenges and move towards an effective education. Inculcation of critical learning, 21st century skills in the curriculum, proper institutional check and balance.

After that, implementation of uniform education system via SNC. Therefore, issues of education has become barrier towards the prosperity of Pakistan.
