

Why Nation Fail?

1 Introduction :-

^{Thesis statement:-}
There are certain structural

Problems in a nation which is not addressed on time.

It results a nation is failed.

There are certain solution by which a nation can be safed from failure.

2 Reasons behind nation failure.

i- Disunity in political sector

- Case study of Afghanistan Political setup

ii- Inconsistency of economic Policy and poor economy

- Break down of Mughal Empire

iii- Bad governance

- case study of Pakistan's government

iv Lack of education

- Comparison b/w Pakistan's education with India and Bangladeshi

v weak military

- case study of Sham^{and} Iraq

vi Lack of patriotisam in people

- In India 1857 war there was lack of patriotisam

vii an fair distribution of resources

Fight between province in Pakistan on resources

3 How can people live in unity?

i- Inclusive government

• charter of Madina

ii- Good governance

• The UAE governance and USA

iii- Trained Military

• case study of developed

country's military The United States of America and England.

iv Education provides to all people

• Developed country education sector -

4 Conclusion

When people live in a society and different societies unite under an umbrella, this is called a nation. People expect when they would unite, their rights would be protected. If a country's leaders do not protect the rights of people or citizens, then the nation is disintegrated. There are certain reasons by which a nation breaks down: when disunity in the political sector, then chaos and anarchy create in a nation. Economy of a country is important when a country's economy is weak, then social instability creates. Governance runs the whole government when the governance system is flawed, then people of the country will be unstable. Education is important for people because education-aware people about their responsibility. Military prevents a nation from bad actors. When military will be weak, then

People of a nation will be unstable. When a leader of nation does not protect the people's right then patriotism between people will be low. When unfair distribution among people then ethical conflict will arise. A nation has certain opportunities by which a nation can address their own problems: Inclusive government is the solution of political stability. When political representative address governance system through policies then governance system efficient. When military of a nation is trained then people of country citizen will secure. Education awares people about right and wrong thing. So, when a nation is failed there are certain reasons behind. If a nation wants to come out then they will have to take corrective measure.

Political instability is structural problem in failure nation. Political setup unite people and make a nation. When these politician do not unite among them instability arises in public. Afghanistan is the example of failure nation. In Afghanistan has different tribes 60% Paktoon, and Tajik, and other. It today they did not make a nation or government because there is political instability and Paktoon is dominant in government and other is not involved in government. The result their government is topple down by another Aripes with international ^{country} involvement. So, Political instability destabilize the whole country.

Economy is important for country running. When politician makes inconsistent economic policy then business man and consumer affects. or a politician makes

biase policy. ~~It~~ gives benefits one class over another class then disharmony creates in nation. The Mughal empire ruled over India around 200 years. When Mughal government did not make inclusive economic policy then their economic situation is worst, and East India Company strong in India because his economic policy. At the end Mughal government was tople down by the east India Company. So, when you country economy is not strong then your nation is weak internally and threat from other country.

Governance runs the whole ~~gokernment~~ country. When a country governance system is weak and burecrasy takes long time to address people problems, and some time officer demands bribes then he solves

People Problems. In Pakistan
governance issue is very high.
The federal government gives more
funds to the Balochistan government
than other provinces, but
Balochistan's problems were
not ~~addressed~~ ^{solved} because there
is corruption high. So, governance
problem ~~is~~ take part in
national failure.

Education awares people
about his right and liabilities.
It also take part in
development of nation. When
a leader of country does not
provide education to all people
then there people will be
targeted by enemy agenda.
The people will against state.
It also that ~~when~~ education
provides skills by which
a nation progress. If a
nation's leader does not
provide education to all then
the nation will weak with
comparison other. For example
Pakistan education budget
was 1.7% of GDP and India
2.77% of GDP in FY-2024.

It results India exports
\$150 bn information technology
service and Pakistan export
\$3.2 bn in FY-2024. So,
The nation who invest in
education section they flourish
and those who do not
invest in education sector
they do not flourish.

Military secure citizen
of country. When Military
is not advance then
they can not face the
current challenges of security.
In past, enemies fight
by traditional way now
~~the~~ fifth generation and proxy
war. So if military is
not able then a nation's
people will be insecure.
Just like, in the middle
east country there are
Syria and Iraq, which
is too disturbed by proxy
war and direct war.
If there military was
capable then no one can
dare to attack on it.

So, this is ~~the~~ nation failure because they did not provide security to the people.

Patriotism means people love his own country. Patriotism is important for a nation because nation made people unity. When people do not love with ~~country~~ then the nation can not survive. In 1857, Independence of war, Muslim and Hindu fought against British but there were Sikh and other categories who supported British that was the result Indian lost that battle. That time Britisher said, "If Sikh did not support then we can not win the battle." So, this is result Patriotism is important in nation. If Patriotism is not in nation then the nation can be failed.

A Nation's leader unfair distribution of resources then ethical conflict arises.

Every citizen of nation has right to take ^{his share} ~~fare~~ resources. If leader distribute share and gives more part to other and less other this result ~~had~~ will create among people. Patriotism will be converted into separation. In Pakistan there is fight between ~~resources~~ provinces on resources. Particularly in KPK and Balochistan. They told that there resources ~~are~~ ^{was} distributed other provinces but in KPK and Balochistan had nothing. So, when resources is not distributed on equity bases then ethical conflict arises and it may be possible of separation of nation.

Inclusive government is the solution of political instability and limiting the ethical conflict. when in parliament ruling party negotiation with

Opposition Party and impart in Policy making. This result political instability will be low and Parliament will be strong. First time when Hazrat Muhammad (S.A.W) made Islamic State in Madina there Hazrat Muhammad S.A.W made ^{agreement with} all tribes and agreed on Charter of Madina. There were all tribes head ~~representative~~ representative in Madina's Parliament. Hazrat Muhammad (S.A.W) led and Hazrat Muhammad (S.A.W) negotiation on worldly matter. So, when government is made on all political representative and participate in ~~action~~ ^{policy} making then a nation will be strong and never will be disunite.

Governance runs the whole country. When government officer perform his work on time and do not involve in corruption. This will be a good governance. There is responsibilities of

Politician who make policy in central level. They ~~require~~ need positive reform in governance related, and power transfer to division level. This result people problem will be easily addressed and solved. The USA is the example of good governance where they made more than 50 states and divide central power to the individual state level that result there ethical conflict does not create and people problem is quickly solved. So, when governance system is improved then the nation will be more strong and unite.

Military secures citizen of ~~protection~~ nation. When civil government invest in military sector, then the military will

be strong and they will easily identify ~~to~~ enemies and eliminate it. Now, this era is 5 generation war and Hybrid war. This time military sector must be strong. The USA and England military is so strong that result his people is protected from external and internal attack. So, when military and civil government align then the country is prosperous and the people of nation is happy because his security right is ensured in nation.

Education educates people about his right and liability to ward state or nation. When nation's leader invest in education sector. It promotes literacy rate and nation progress. because we see those countries who invested in education sector now they lead the world

economy and his people is happy. China is a East Asia country now He is becoming number one economy in world. Behind success is ~~not~~ invested in education sector. now, they ~~become~~ ^{make} new latest technology. So, those country invest in country they become a strong nation and his people become happy in life.

A nation is failed because there are some structural problem in nation which is not addressed. Instability in politics destabilize the nation. when economy is not good in nation then people of nation are unhappy. Governance runs the whole government when governance system is poor then nation is affected.

Lack of education affects nation because people unaware his right and ~~responsibilities~~ liabilities.

toward state. ^{weak} Military is another issue in failure nation because they protect people from enemy attack. ~~Patriotism~~ Lack of Patriotism is another issue because a nation can not become without Patriotism. Unfair distribution of resources creates ethical conflict. A Nation can be protected or safe from failure when a people live in unity. Inclusive government maintain unity in people. Good governance solves problems on time and take part in unity of people. Trained military secure citizen from external and internal threat. Education institution promote unity and ~~to~~ strengthen economy and technology. So, when nation's leader ~~follow~~ these address their ~~own~~ problems which mention in above paragraph then nation can be protected ~~and~~ and saved from failure.
