

Paragraph on weaponisation of Gold:

Russia, China, Turkey and have steadily increased their gold reserves. This is the weaponisation of gold. The rising economies have challenge the US lead economic world order by making gold as reserve instead of dollar. They show that the dollar is not reliable as reserve any more. That shift will affected the world economic system as price hike of gold and desubstitution of dollar also harm the global trade. In the same way, US try to stabilise the dollar ~~may~~ may come to direct economic confrontation with rising economies. ~~It~~ with that there is an other economic sanctionism start as we seen in the context of US-China economic rivalry. So the rising dependancy on gold highlighted the decline of dollar, so Pakistan also make its policy according to the changed environment and ~~as~~ increase its gold reserve.
