1) The main theme of the passage is continuous technological innovation and progress and its relationship with humanity. It emphasizes the evolving relation between the two by shedding light on multiple facets like education technology, the ethical concerns with (artificial) the involvement of AI in daily human life and the non-availability of technology to (a few) some individuals creating disparity/digital divide.

2) The education is quickly adapting to the digital landscape as there is a ^{increase} ~~the~~ in online learning and e-learning platforms with the rise in education technology, there are better opportunities for everyone across the globe to improve their knowledge and skills. But there

There are challenges like ethical concerns about integration of AI, dependency on machines and the digital divide created due to non-availability of technology among some areas.

3) With the technological advancements and its increased importance, there is a digital divide created among the individuals who can access the new advanced technologies and those without it. Inclusivity is crucial to achieve, otherwise some groups within the society will be left behind in this digital world and would not be able to benefit from the ^{technological} progress.

The educators play an important role to promote such educational policies that ("include all the children") allow all students to have access to education technology.

and to inculcate a sense of responsibility and ethics among them.

4) The advanced technology and presence of artificial intelligence has increased human dependency on machines. By allowing it to make decisions on human's behalf, ~~there~~ there are ^{ethical} concerns about its increased involvement in human life.

As the passage highlights the intersection between technology and ethical consideration by talking about the importance of transparency and careful use of AI and other advanced technology.

5) The message regarding the responsibility of individuals and society as a whole in navigating the intersection of humanity and technology is that it is the duty of all to adopt new technology but with

utmost ~~in~~ care and morality. It is essential to follow the rules of equity, inclusivity and ethical awareness. This will only happen by careful AI practices, by providing access to the advanced technology to the deprived and to allow equitable access to all.
