## Title: Importance of Urban Green Spaces

In the rushing life of cities, parks are a source of happiness and peace. These green fields provide variety of wildlife as well as mental well-being. Green spaces enhance beauty and increase community integration through various ways. ~~Like, picnics, sports, cultural festivals, open air concerts and art installations.~~

Do not include examples in precis. Just write their gist.

These urban green spaces have positive impact on mental health and overall well-being. But, there is a challenge of balancing between urbanization and preservation of green areas. So, sustainable urban planning is essential for health of humans as well as for environmental protection. The preservation and betterment of parks along with sustainable urban planning is necessary for progress.
