conclude this, education decides future of nation by providing knowledge, skills and values to

make citizen responsible which is essential for national development.

classroom play a pivotal role in ensuring the future of nation by emphasizing character development among students. It is not a place where academic education or subject are taught but a space where moral and ethical values are

Are also instilled

instilled. character education develops within classroom lessons, emphasizes values like honesty, respect and responsibility which are crucial for personal well-being. **Example.** Finland recognize globally for its exceptional education system prioritizes character development alongside academic achievements. Such emphasis on character development raises young people to make responsible decisions and contribute positively to their societies.

Classroom plays a vital role in promoting harmony among societies by teaching students the values of ethical norms and tolerance. Student develops their skills related to cultural understanding, co-operative learning methodologies and discussions about global issues.

Example. Singapore emphasizes multicultural understanding in starting age. They make such policies which integrate students from different ethnic groups.

The classroom is fundamental in providing education that makes people literate. Literacy is not just ability to read and write but also empower people to engage in economic, social and political activities. Classroom are structured environment where students receive instruction in reading, writing and critical thinking skills.

Example. Literacy program in

Countries like South Korea, where significant investments in education, the emphasis on classroom based education lifted literacy rates from below 30% in the 1950s.

Classroom play a pivotal role in fostering economic growth and development. So student don't learn only theoretical education from institutes but also learn skilled education which prioritize his critical thinking and solving problem skills. From this attribute student engage in different development programs lead to development of their country. Example. The research initiative and collaboration emerging from classroom at Stanford University in USA leading to innovation development. This culture of research not only develop economic growth but also created million of jobs and transformed the global economy.

Modern classrooms enhance a nation's collective knowledge, ensuring a brighter and prosperous future. By fostering a cultural growth and intellectual skills, classroom prepare students to compete in areas like science, technology and economics. The well-developed knowledge set enables nation to innovate, compete globally. **Example.** Japan ~~have invested heavily~~ led to advancements in technology and engineering. They ensure that future generation are well-equipped to address challenges.

However, one of main reason behind inappropriate classroom education is lack of resources and infrastructure. Many cities of Pakistan facing serious issues like lack of resources, textbooks, classroom environment, qualified teachers, and outdated facilities. This condition also affect student's ability to learn but also a serious hurdle in way of teaching so that teacher don't learn

with their full potential.
Example. In rural areas of Pakistan a significant number of public schools lack proper classrooms, clean drinking water and sufficient teaching staff reports from UNICEF.

~~For instance, outdated teaching methods and curriculum are significant factors contributing to inappropriate classroom education. Many educational students rely on traditional teaching, cramming method to analyse and learn lesson that focuses primarily on rote memorization rather than critical thinking. This mismatch between curriculum and modern demands creates a knowledge gap reducing the effectiveness of classroom education. Example, In India where a large number of schools still use outdated textbooks and teaching methods which are having impact on education standards.~~

Furthermore, political instability and

Lack of focus on education sector are significant obstacles to ensuring quality education. In politically unstable countries they don't focus on education sector and frequently changes in policies regarding education affect whole education system. Politicians are mainly focus on their position and development in education are considered as second priority. So their nation facing inappropriate education led to harsh impact on education standards. Example: The country like Afghanistan where political instability has been a persistent issue, education system has been severely impacted.

In addition to one of key step ~~to improving classroom education is~~ **For improving** increased funding in educational infrastructure. Funding in education sector includes providing physical resources, technological tools and necessary teaching equipment to develop effective

Education Success

learning environment. Physical resources comprising better environment, safe and clean classroom, sanitation, good food and water so that student develop their intellectual skills. Modern tools must be provided to student i.e. Labs equipment, library books etc. to development of students knowledge. **Example.** Countries like South Korea and Finland given the importance of well-funded educational systems. Finland focus on small class size and well-equipped schools has contributed to its success in global education rankings.

Moreover, Improving classroom education by improving new teaching methodologies is a crucial step. Tradition teaching methods such as rote memorization are inadequate in preparing students for complexities of today's world. To foster critical thinking, creativity and

problem solving skills. **Example.**

Singapore and Canada have successfully implemented innovative teaching methods such as inquiry-based learning to make learning more engaging.

Good effort but we need lot of expression improvement

As for As, Ensuring equality in providing quality education for all citizen is crucial to national progress and social cohesion. When every citizen, regardless of their gender, socioeconomic status, ethnicity or geographical location, have access to quality education. **Example.**

Countries like Sweden have made outstanding movement in ensuring to provide quality education to all citizen. They spend 4% of their GDP on education and rank on 5th position in global chart. Ensuring quality education also promote social justice which contribute to more suitable society.

In conclusion, classroom plays a crucial role in shaping the future of a nation by fostering education that not only provide individual to academic knowledge but also with essential skills for personal and national developments. By focusing on improving resources, updating curricula, ensuring equality and introducing modern teaching and technological methodologies, we can push our education system in a way of progress. Moreover, our youth also enjoy this opportunity and learn in effective teaching environment led to compete the complexities of modern's world. While political stability and strong institutions are crucial, they also play a pivotal role in nation's progress and global competitiveness. Moreover, investment in education directly correlate with nation's
