Distance education learning in Pakistan: Opportunities and Challanges.

1 **Introduction :-**
   Thesis statement :-
   Distance education learning is the new method of learning in the 21st century. Pakistan has many opportunities of distance ~~ledfeetion~~ education learning but there are some hindrances in the way. It can be addressed by government of and Public efforts.

2 **Distance education learning opportunities in Pakistan:**
   i- Online education learning is cost effective.
      • Example save hostel rent and transportation cost
   ii- Student can learn different courses.
      — U.table source of dif courses.
   iii Student can learns from global level teacher.
      Pakistani student can learn from British teacher
   iv Online education is very flexible

Address the opportunity instead of benefits (opportunities may include the availability of internet service etc)

v- Online education is environment friendly.
Environment protects from transport's gas emission.

3 Distant education learning challanges in Pakistan:
i- Blockage of mobile phone signals and weak internet.
• In August 2024, Internt was too weak. Dawn
ii- far areas ~~are~~ is deprived ~~from~~ of internet facility.
• EX fata and far areas of Northern kpk
iii- Illiteracy high rate in Pakistan. [Phrase it properly]
• Census 2023, 38% Pakistan people illiterate and misuse of technology.

4 How can [Structurally not correct] Distance education learning problems in Pakistan?
i- Promote illiteracy rate and positive use of technology.

ii- Invest on **in**ternet sector for Strengthen internet.

iii Government should ~~expand~~ available internet facility to far areas.

Phrase it properly

Conclusion

Before online learning education, people had only one way of education learning which ~~was~~ was traditional education learning. Now, people has two opportunities of education learning: i- traditional and online education learning. Online education learning is very creative in the 21st century. Pakistan has many opportunities : online education is cost effective and student has different courses ^opportunities ^which can be learnt through online education. Online education is flexible. student can learn

when he is free his work.
Online education is also
environment friendly. There
is also some challenges
in the way of online education
learning. In Pakistan, Internet
speed is slow and government
off the mobile signal due
to security reason. Pakistan
has also far areas have
deprived internet facility in
Pakistan. Many Pakistani
are also illiterate, that
reason they do not about
usage of technology. These
weaknesses can be corrected.
If government promote
Illiteracy rate and aware
people about technology.
Gov also make policy regarding
Internet communication, while
Investor invest in internet
communication sector, and
government should available
Internet facility in far
areas. Hence, Pakistan has
many opportunities, but
there is also challenges

In the way of online education learning. It can be metigated by government and public efforts.
