

TOPIC:-

"Instruction in Youth Is Like Engraving in Stone"

OUTLINE:-

A. Introduction

B. Instruction in Youth is like

Engraving in Stone:-

1. During youth, children learn the basics of reading, writing, speaking, and mathematics, which form the foundation of their future education.

2. Instruction in youth develops critical thinking, communication, teamwork, and decision-making skills, which are utilized throughout their lifetime.

3. Instruction in youth determines their inclination towards various subjects or fields in which they specialize for future careers.

4. Instruction in youth molds their opinions and beliefs, which are developed during this age.

5. Instruction in youth plays a pivotal role in their character development.

6. Instruction in youth about financial literacy helps them to understand the basics of money management, saving, investment, and budgeting.
7. Instruction in youth provides them opportunities for well-paid jobs, ending the cycle of poverty.
8. Instruction in youth prepares them for future leadership roles in a state's government.
9. Instruction in youth provides them exposure to different cultures, creating a sense of tolerance and open-mindedness towards different cultures.
10. Positive support and guidance builds resilience in youth to face challenges of life.
11. Instruction in youth enables them to develop healthy relationships and interactions within the society.

C. Conclusion

## ESSAY:-

United Nations specifies the age of youth between 15 and 24 years. These years are quite critical in an individual's life. During this time<sup>period</sup>, the minds of individuals are flexible. Individuals, in their youth, are like sponges, which soak up everything they see, hear, or experience. Similarly, the sayings, behaviors, lessons, <sup>or</sup> values learned during youth leave long-lasting imprints on young minds. The popular African proverb highlights this fact: "Instruction in youth engraving in stone." Stone, as a natural material, is a symbol of longevity and permanence. If something is carved in the stone, it lasts forever. In the same manner, the analogy drawn between stone and youth <sup>reflects</sup> shows that instruction given to young people remains unchanged and permanent. During this period, <sup>individuals</sup> ~~children~~ learn the foundational skills of reading, writing, speaking, and

mathematics, which help them throughout their educational journey. Similarly, instruction in youth develops critical thinking, problem-solving, and decision-making skills, which are utilized by them forever. Also, it is through instruction that young people determine inclination towards various subjects and fields to specialize for their future careers. Additionally, opinions and belief systems are formed during youth stage through instruction. It is during young age that the character of individuals is developed, in which instruction plays an influential role. Moreover, instruction in youth about financial literacy helps them in their financial matters for lifetime. Therefore, it is rightly said that "Instruction in youth is like engraving in stone" as the lessons, values, and beliefs learned during this stage are permanently ingrained on young minds and cannot be erased.

To begin with, instruction in youth is like engraving in stone

because during this stage, they learn the basics of reading, writing, speaking, and mathematics. These skills form the foundation of their future education. If children are given good quality of instruction in developing their reading, writing, and speaking skills, they can easily adapt to the successive stages of education i.e., primary, secondary, higher, and tertiary education. Also, children with well-developed reading and writing skills can easily grasp new concepts and have command over most subjects. According to Global Study on Early Literacy by UNESCO (2020), literacy development in early childhood sets the stage for "lifelong learning and academic success".

Also, ~~instruction in youth~~ <sup>during young age</sup>, individuals develop critical thinking, communication, team-work, and decision making skills due to which instruction in youth is like engraving in stone. These skills are utilized by the people throughout their lives in all ways. With positive support and guidance, individuals learn how to make the right decision at the right time. In addition,

a mind, equipped with critical thinking skills, can better understand the complex realities of the world. As stated by the Greek historian, Plutarch: "Education is not just about filling the mind with information, but about lighting a fire within it". Instruction in youth compels them to explore more and more about the world. Therefore, <sup>the</sup> critical thinking, communication, and decision-making skills learned by young people through instruction helps them for lifetime, just like engraving on stone.

Moreover, instruction in youth is like engraving in stone because it is through instruction that they determine their inclination towards various fields. After indentifying their interest and aptitude in a particular subject, they decide to specialize in it for future careers. By providing guidance and support, young minds explore their interests and learn about various career options available to them.

Instructions for career counselling help youth to understand the qualification, tools, resources, and skills required for a particular field of their choice. As per UNESCO, career counselling play a "crucial role in shaping the future of young people". Hence, through instruction, youth identify their career inclinations, which shapes their entire future and life, just like engraving in a stone.

Further, instruction in youth is like engraving in stone because in this stage of life, they form their opinions and belief system. They adhere to these opinions and beliefs for the rest of their lives. During the early years of <sup>their</sup> lives, individuals tend to learn everything they see and hear within their surroundings, particularly their families. Agents of socialization like family, education, religion, media, and peer groups have significant influence in forming the opinions of a person. For instance, a study in political science, called "Impressionable

"Years Hypothesis", conducted by Markus and Converse in 1979, shows that opinions formed during adolescence and early adulthood tend to crystallize and become stable over time.

Once these opinions are formed, they become resistant to change as people age. Thus, opinions formed during youth are permanent, just like engraving in a stone.

In addition, instruction in youth plays a pivotal role in their character development, which is equivalent to engraving in a stone. The process of character development of an individual begins in his/her childhood.

Instruction and guidance provides a moral compass for shaping the moral and ethical values of people. During formative years, values like discipline, honesty, empathy, responsibility, and modesty are instilled in individuals. According to the Association for Moral Education, "youth exposed to consistent ethical instruction exhibits greater self-control, empathy, and a strong sense of responsibility." Hence, values learned during the character development process by the youth are long-lasting,

just as engraving in a stone.

Also, instruction in youth about financial literacy helps them ~~to understand~~ <sup>throughout</sup> their lives the basics of money. It makes them capable to understand the basics of money management, saving, investment, and budgeting. By understanding these concepts, youth is equipped with the tools to make informed decisions about their financial futures. It can result in financial stability and success in the long run by making best use of resources and avoiding financial losses. As stated by United Way of the National Capital Area, financial literacy enables youth to "take advantage of opportunities and build financial security for themselves and their families." Therefore, instruction in the form of financial literacy helps young people in all aspects of life, similar to engraving in a stone.

Likewise, instruction in youth enables them to acquire well-paid,

which benefit them throughout their lives. If youth receives proper education and guidance, they can break the cycle of poverty in which they and their families are trapped. Instruction is an important means to acquire well-paid jobs and career ambitions.

Instruction equips the <sup>young</sup> individuals with all the necessary qualifications, skills, and abilities, which are required in the job market. According to World Bank, there is an increase of 9-10% in <sup>annual</sup> hourly earnings for every extra year of schooling. Hence, instruction in youth is an important tool for them to get well-paid jobs, which is a life-long asset similar to engraving in a stone.

Instruction in youth prepares them for future leadership roles in a state's government. It is the leadership of a country that determines its future. If young people are given quality education, support, and guidance, they can emerge as

great leaders for a state's government. Moreover, instruction in youth can help them develop better leadership skills through effective training and skill-building programs. Nelson Mandela rightly said, "The youth of today are the leaders of tomorrow." Thus, instruction in youth is like engraving in a stone as it prepares them for leadership roles to run a state's government.

Additionally, instruction in youth provides them exposure to different cultures, which helps them to navigate the society for the rest of their lives, just like engraving a stone. It creates a sense of tolerance and open-minded attitude towards different cultures. When youngsters study at different educational institutes throughout their lives, they get an opportunity to socialize with people of ~~different~~ <sup>diverse</sup> cultural backgrounds. They learn how to respect other cultures and co-exist with them, without any discriminatory feelings. According to Emile Durkheim's theory

great leaders for a state's government. Moreover, instruction in youth can help them develop better leadership skills through effective training and skill-building programs. Nelson Mandela rightly said, "The youth of today are the leaders of tomorrow." Thus, instruction in youth is like engraving in a stone as it prepares them for leadership roles to run a state's government.

Additionally, instruction in youth provides them exposure to different cultures, which helps them to navigate the society for the rest of their lives, just like engraving a stone. It creates a sense of tolerance and open-minded attitude towards different cultures. When youngsters study at different educational institutes throughout their lives, they get an opportunity to socialize with people of <sup>diverse</sup> different cultural backgrounds. They learn how to respect other cultures and co-exist with them, without any discriminatory feelings. According to Emile Durkheim's theory

On "Education and Social Solidarity",

Education is a mechanism that promotes social cohesion in diverse societies.

Therefore, instruction in youth develops a cross-cultural understanding in them to adjust properly in the society for life time.

Similarly, positive guidance, support and instruction builds resilience in youth to face the challenges of life. The journey of life is riddled with obstacles and adversities and it is instruction that instills resilience and strength in the youth to weather the storm. As they navigate various challenges, whether academic, personal, or social, they develop a sense of adaptability and persistence. The guidance provided by mentors and educators helps youth to develop problem-solving and emotional coping mechanisms. According to the National Scientific Council on the Developing Child (NSCDC), nurturing resilience in children through educational experiences helps build

"A strong foundation for their lifelong success". Hence, instruction in youth makes them resilient to face the hardships of life.

Lastly, instruction in youth enables them to develop healthy relationships and interactions within the society, which stay with them for lifetime. Instruction in youth about socialization skills enables them to develop good communication skills and positive self-esteem. They learn to understand the sensitivities of family and other relationships and how to respect them. Also, instruction in youth enables them to handle complex situations arising in relationships and <sup>maintain a</sup> balance between different relationships. For example, Social and Emotional Learning (SEL) Programs in schools are aimed at improving students' emotional skills, social behavior and relationship outcomes. Therefore, instruction in youth is an important source for training them to develop balanced relationships during their

levels.

In conclusion, there is no doubt in the fact that instruction in youth is like engraving in stone because during this time period the minds of individuals are flexible to learn everything they see, hear, or experience. The behaviors, values, habits, or skills learned during this phase are permanent just as something carved on the stone is ever-lasting. It is during the formative years that children learn the basics of reading, writing, and speaking, which form the foundation of their future education. Also, instruction in youth plays a critical role in their character development. It helps them to acquire well-paid jobs and end the cycle of poverty. Moreover, instruction in youth prepares them for future leadership roles in a state's government. Socialization with individuals coming diverse cultural backgrounds fosters a sense of tolerance and co-operation among youth, ensuring their survival in the society. Additionally, challenges

by youth, whether academic, personal or social develops resilience among them through positive guidance and support. Finally, instruction in youth enables them to develop healthy relationships and interactions within the society. Ultimately, it is the youth of a country that decides its fate. If this youth is given proper instruction and guidance related to all aspects of life, it will turn out to be an "asset" for the country rather than a liability. Instruction in youth is an important way to unravel the potential possessed by individuals in this age, when they are filled with energy, passion, physical and emotional strength, and courage.
